Please provide a funding and dash card update, I received an email confirming funds transfer initiated to account ending in 0000 on 6/4/2021 and the estimated time for funding was 3-7 business days, however I unfortunately never received an email confirmation for dash card processing. I've communicated with numerous representatives of blue acorn down to this morning and they has all reassured me of no errors and advised to just be patient, however I would just like to receive an internal update since they also advised they are not allowed to provide me with account specifics.

Any information would be tremendously helpful to understanding this process.

Thanks in Advance
