BHN Diagnostic Assessment: Interpretative Summary / Assessments

Interpretative Summary

Interpretative Summary: What in your clinical judgement are the need areas, the factors that led to the needs, and your plan to address them?
Ms. Aticha Jittaphol is a 32 year old transgender female, who was referred to Hope Center from Carlson Recovery Center with primary diagnoses of Amphetamine Stimulant Use Disorder. She denies any secondary diagnoses or interest in MAT. Aticha is currently on federal probation and in continual

Hope Center - BHN Diagnostic
Information

communication with her PO. She currently rents her own apartment and is the owner of her own business. Atichia's chronic substance use, and probation, has lead her to believe her life needs redirection and assistance back on track.

Based on the initial assessment, the central themes that will need to addressed in CSS level of care are:

- #1) potential for further relapse.
- #2) legal issues.
- #3) aftercare.

The anticipated challenges Aticha will need to focus on while she is in CSS level of care are:

- #1) risk management, identify relapse triggers.
- #2) remain in continual contact with probation.
- #3) follow stipulations put forth by court (further treatment or obtain an IOP).

Hope Center - Clinical Stabilization
Services Discharge Summary

Session Information

Client:	Jittaphol, Aticha (260293)
Staff:	Fenton, Colleen (007843)
Document Date:	1/3/2022
Client Program:	(Not Set)

Treatment Summary

Date of Discharge:	01/27/2022
Strengths, Abilities, Needs and Preferences:	Upon admission, Ms. Jittaphol's strengths, needs, abilities and preferences were assessed as follows: S - "good with meditation, understand other people, kind." N - "I do not need anything." A - "sports, business, organization." P - "be successful, take care of my family and return home." Upon completion they were assessed as follows: S - To focus on self. N - To stay away from people who are using. A - To reach out to a friend to get to a meeting. P - To remain abstinent.
Discharge Destination:	Home

Treatment Summary

Reason for Seeking Treatment:	Ms. Aticha Jittaphol was referred to Hope Center from Carlson Recovery Center with primary diagnoses of Amphetamine Use Disorder. She denies any secondary diagnoses or interest in obtaining MAT. She is currently on federal probation and denies any appointments. Ms. Jittaphol would like to return home however probation requires further treatment.
Interventions/Responses:	Include information on interventions/services provided and person's response to interventions. Ms. Jittaphol was subject to numerous groups including daily process groups and psycho-educational groups with such topics as Motivation, Relapse Prevention, Overdose Prevention, Recognition and Response, Anger Management, Spirituality, Nutrition, Stages Of Change and Coping Skills, compulsive behaviors, Living Sober, and Roadmaps.(treatment plan goals/ review). Ms. Jittaphol also participated in 1:1 one-hour counseling sessions, several times a week. Ms. Jittaphol attended AA/NA meetings that came into the facility. Ms. Jittaphol actively participated in all groups, inside the house as well as individual sessions. She responded well to all interventions and participated in all aspects of programming. Ms. Jittaphol responded well to all most of Treatment as indicated in the outcome listed below.
Outcomes:	Include qualitative and quantitative information regarding progress/gains achieved, strengths, abilities and preferences. Specify any standardized measures used. Based on the initial assessment, the central themes that will need to addressed in CSS level of care are: #1) potential for further relapse. #2) legal issues. #3) aftercare. The anticipated challenges Aticha will need to focus on while she is in CSS level of care are: #1) risk management, identify relapse triggers. #2) remain in continual contact with probation. #3) follow stipulations put forth by court (further treatment or obtain an IOP). Ms. Jittaphol made great strides in areas of developing coping skills, gaining insight as evidenced by increasing participation in groups and individual counseling sessions. Ms. Jittaphol also showed improved insight through homework assignments, listing high-risk events that could trigger relapse, long-term and short-term goals for recovery, employment, interpersonal relationships,
