13 HIGHLY CONFIDENTIAL

14 VIDEO-RECORDED DEPOSITION OF JANE CLONINGER

15

16 Wednesday, June 11, 2025

17 San Francisco, California

18

19

20

21

22

23 Stenographically Reported By:

24 Hanna Kim, CLR, CSR No. 13083

25 Job No. 7413877

1 A. Yes.

2 Q. Okay. During that time at Edgar, Dunn and
3 Company, what was -- who were your clients? Not --
4 not the names, but, just generally, what kinds of
5 companies were they? 09:47:04

6 A. I did a lot of work for the different
7 payment brands. I did work for some processors,
8 some startups, some -- some of the acquirers.

9 I -- I did work in the U.S. I did work in
10 Europe and in Australia as well. 09:47:29

11 Q. Okay. Were you based in San Francisco the
12 entire time?

13 A. Yes.

14 Q. Okay. And did you -- during your time at
15 Edgar, Dunn and Company, did you do any work for any 09:47:37
16 card issuers?

17 A. I did.

18 Q. You did?

19 A. Mm-hmm.

20 Q. And just try to answer with a "yes" or 09:47:45
21 "no."

22 A. I'm sorry.

23 I -- yes.

24 Q. How many card issuers did you do work for,
25 approximately? 09:47:55

1 A. I have no idea.

2 Q. Okay. Did you do any work with the -- for
3 those card issuers on projects that involved EMV
4 chips?

5 A. Yes. 09:48:04

6 Q. Okay. How many of those?

7 A. Again, I don't know. I mean, I did --
8 most of my work that -- in the U.S. for EMV wasn't
9 directly with the card issuers. It was with the
10 card brands. 09:48:18

11 And I did a lot of work for both of the
12 card brands, the major card brands, Mastercard and
13 Visa, on developing business cases and understanding
14 the U.S. market and deployment plans, how they might
15 work through this market to implement EMV. 09:48:39

16 Q. Okay. And we'll get the -- to that in a
17 moment. But, first, in your work with the card
18 issuers while you were at Edgar Dunn, did I
19 understand you correctly to -- to say that your work
20 with card issuers was a smaller part of your EMV 09:48:53
21 work?

22 A. Yes. Most of -- well, my work in the U.S.
23 in -- in -- so I worked with one -- at one major
24 bank. It was a bank that had a focus on -- had a
25 large government portfolio, a commercial card 09:49:12

1 A. Yes.

2 Q. Within each portfolio, did you do a
3 separate business case for different products within
4 the portfolio?

5 A. No. 09:51:48

6 Q. Okay. What is a "business case," as you
7 use the term?

8 A. A business case is an analysis that looks
9 at the costs of a new project, whatever those may
10 be, and the benefits of doing it and calculates the 09:52:08
11 net incremental difference between the current
12 process and whatever this new one will be and
13 calculates a net present value and breakeven.

14 And it determ- -- makes a determination
15 whether it makes economic sense to move forward. 09:52:31

16 Often, especially with EMV, it also looked
17 at intangibles, things that couldn't be quantified.

18 Q. What types of intangibles?

19 A. Things like the -- the welfare of the
20 consumer, what's best in -- you know, of the -- the 09:52:51
21 co- -- the user experience, security, safety, the
22 payments, the -- the risk to the payment system of
23 not having something that is secure, the trust that
24 has to be there for payment cards.

25 Q. Okay. 09:53:11

1 So you mentioned a cost benefit analysis.

2 A. Mm-hmm.

3 Q. What were the types of costs that went
4 into this analysis?

5 A. Well, the primary cost for an EMV business 09:53:18
6 case is the cost of the new cards. So the -- the
7 chips especially are the primary element.

8 There are also costs associated with
9 things like updating consumer communications,
10 updating systems. You have to update the 09:53:40
11 authorization system, the customer service system, a
12 number of system upgrades.

13 There are -- are tweaks. Modifications
14 are needed to set different pa- -- the parameters
15 differently. 09:53:54

16 And then updating and training the
17 customer service reps that are dealing -- that both
18 their system and their card management system has to
19 be upgraded.

20 So there's a -- a number of -- of changes 09:54:06
21 throughout the operational processes that have to be
22 made.

23 Q. So when you were doing these business
24 cases, the information about all of those costs that
25 you mentioned, were you the one determining what 09:54:19

1 was -- the major focus was EMV.

2 Q. And -- and we were talking about business
3 cases before we went off the record. What was the
4 purpose of the business case? Like, once you
5 delivered it to the -- the client, what did they do 10:00:35
6 with it?

7 MS. C. CHAN: Objection.

8 THE WITNESS: They used -- some of it was
9 used internally for helping them make decisions
10 about how they were going to approach the different 10:00:47
11 markets. In Canada, it went immediately to the
12 board, and the board decided to go to EMV, so it was
13 an immediate decision to start migration to EMV.

14 In the U.S., it was more -- a lot of prep
15 than helping them think through the issues and set 10:01:16
16 their timing. And then updating -- we updated the
17 business case several times before they finally
18 decided to come out with their -- their mandates and
19 the liability shift.

20 BY MS. Y. CHAN: 10:01:31

21 Q. What kinds of updates?

22 A. We just started over from the beginning,
23 updated every assumption and recalculated the
24 business case.

25 Q. What prompted the need to update and start 10:01:39

1 over?

2 A. I'm not sure I know other than internally,
3 they had decided they wanted an update because
4 things change in the market.

5 Q. And with the updates, then the -- the 10:01:49
6 output of the -- of the business model was
7 different?

8 A. Similar, but different. Yes, it would
9 have -- it was getting -- each time it got more
10 positive. 10:02:01

11 Q. What do you mean by --

12 A. Mean --

13 Q. -- "positive"?

14 A. -- meaning that the benefits got stronger.
15 And at the same time, the costs of chips were 10:02:12
16 dropping. So the actual business case became more
17 positive and -- and stronger case for moving to EMV.

18 Q. Okay. So to be clear, you were not the
19 one making the decision about whether to convert any
20 of these programs to EMV; correct? 10:02:33

21 A. Correct.

22 Q. Okay. And in the U.S., in the scenarios
23 that you described where the business cases were
24 updated, your clients did not respond to the first
25 business case by immediately adopting EMV chips; is 10:02:43

1 that correct?

2 MS. C. CHAN: Objection.

3 THE WITNESS: I don't think they ever
4 intended to respond at that time. But, yes, they
5 did not -- no, they did not respond.

10:02:53

6 BY MS. Y. CHAN:

7 Q. Okay. Do you know what other
8 considerations, in addition to the business case,
9 went into the decision about whether to convert to
10 EMV chip technology?

10:03:02

11 A. Well, I think a lot of the nonquantifiable
12 parts of the equation were extremely important.
13 It's very important for the payment system, for
14 cards, to be us- -- to be used everywhere. Ubiquity
15 is way -- the way we refer to it. And it's -- it 10:03:26
16 had gotten to the point in the U.S. that you
17 couldn't -- people traveling from the U.S. to Europe
18 couldn't use their cards because they were
19 magstripe, and Europe had already conv- -- had
20 already converted and were no longer accepting in 10:03:46
21 many places magstripe cards.

22 And -- for example, I was at a conference,
23 it's a big conference every year in Paris. And a
24 bunch of very senior executives in the payments
25 industry were standing in line trying to get cards 10:03:59

Page 29

1 positive business case where benefits exceeded
2 costs?

3 A. That's not my testimony.

4 Q. Okay. Did any of the earlier business
5 cases produce a positive business case where 10:06:03
6 benefits exceeded costs?

7 A. I don't remember. I know they got
8 stronger each time. But I don't remember the point
9 in time in which they crossed over.

10 Q. Okay. In your experience doing business 10:06:19
11 cases with clients, did your clients immediately
12 adopt EMV chip technology as soon as the benefits
13 were shown to exceed the costs?

14 MS. C. CHAN: Objection. Compound.

15 THE WITNESS: I think clients used the 10:06:34
16 business case as one of many parts of their
17 decision. That's my impression.

18 BY MS. Y. CHAN:

19 Q. Okay. When you were putting together your
20 business cases -- and -- and how many did you do 10:06:48
21 while you were at Edgar --

22 A. I don't know.

23 Q. Approximately.

24 A. I have no idea.

25 Q. Okay. When you were putting together your 10:06:54

1 numbers that go into the business case.

2 Q. Okay.

3 A. It's -- it's the core part of the business
4 case.

5 Q. And the models that come -- or the numbers 10:10:45
6 that come out of the models, those differ for each
7 issuer; correct?

8 A. They can vary on the size, the number of
9 cards will define the costs, so yes.

10 Q. And what the business case looks like also 10:11:00
11 differs for each issuer?

12 A. The elements are all the same, so they
13 look very similar. But it -- it'll vary by scale.

14 Q. Right. The output differs?

15 A. Right. 10:11:18

16 Q. So you wouldn't take a -- a business case
17 that you did for one card issuer and then go to a
18 different one and say I already did the analysis,
19 this applies to you?

20 A. No, never. 10:11:26

21 Q. At the completion of the business case,
22 would there be a recommendation or some sort of
23 proposal that went along with it?

24 A. There would be a delineation of what it
25 meant to -- you know, to go forward, or this is not 10:11:46

1 a positive business case or this is a positive
2 business case --

3 THE COURT REPORTER: This is not a?

4 THE WITNESS: Positive business case or
5 it's not a positive business case. It makes sense 10:11:58
6 to go forward. It -- it might not make sense to go
7 forward. You need to weigh the costs here and the
8 intangibles and make a decision. So we would be
9 laying out the parameters and leaving the decision
10 to the client. 10:12:14

11 BY MS. Y. CHAN:

12 Q. Okay. And just to try to keep your voice
13 up.

14 So we talked about different models and
15 different outputs for each issuer, but each issuer 10:12:24
16 also has different portfolios; correct, different
17 products?

18 A. Yes.

19 Q. Okay. And so, each of those products
20 would also require their own model and business 10:12:34
21 case?

22 A. No.

23 Q. Each portfolio would require its own model
24 and business case?

25 A. We looked at all of credit together. So 10:12:42

1 losses. Is -- are those some of the -- sorry, some
2 of the benefits -- let me start over.

3 We talked about the costs. So let's talk
4 about the benefits. Are -- is the avoidance of
5 fraud loss one of the benefits that goes into your 10:15:37
6 business case?

7 A. It's the primary benefit.

8 Q. Okay. Where does that information come
9 from when you're doing a business case?

10 A. Well, first, we have to look at historical 10:15:45
11 fraud losses. And we're only interested in
12 card-present counterfeit fraud because it's the only
13 fraud that EMV addresses. So we would look at
14 historical, and then look at -- and work with the
15 clients to develop the fraud curves that they would 10:16:06
16 expect on, kind of, a do nothing scenario. So stay
17 with magstripe, this is what we expect.

18 And then we would look -- use that as a
19 baseline and say based on what we know from other
20 markets, as they converted, this is what happened to 10:16:24
21 fraud. And it started declining at -- at a certain
22 amount of intersection of -- of cards and merchants.
23 And so, then we would develop various scenarios
24 based on historical markets on data and vet those
25 with the client. 10:16:47

1 Q. And that data about fraud loss
2 attributable to card-present counterfeit fraud, is
3 that data that was provided to you from the client?

4 A. Yes.

5 Q. So you did not look at their overall fraud 10:16:57
6 loss data and do your own determination about what
7 part of it could have been provided by a chip;
8 correct?

9 A. We know -- it's well known and well
10 accepted that what EMV addresses is only 10:17:10
11 card-present fraud, counterfeit fraud. So that's
12 the only category of fraud that we looked at because
13 nothing else is material.

14 Q. But when you looked at that fraud, it --
15 the information came from the client, you did not do 10:17:29
16 your own and analysis of whether there was fraud
17 that would have been provided by a chip; correct?

18 A. We did our own analysis of how much fraud
19 was going to be prevented by EMV. So I --

20 Q. Let me rephrase. 10:17:48

21 So when you're working with a client,
22 let's say that -- let's start off with their overall
23 universe of fraud loss, not all of that is
24 card-present counterfeit fraud; correct?

25 A. Right. They have other types of fraud. 10:18:04

1 Q. Okay. And you only looked at the
2 card-present counterfeit fraud; is that -- is
3 that --

4 A. It's the only -- it's the only type of
5 fraud that was relevant. 10:18:13

6 Q. Were you the one that identified from that
7 universe of data which portions of that were
8 attributable to card-present counterfeit fraud, or
9 did someone at the client give you the information?

10 A. Someone at the client typically gave the 10:18:25
11 information. They would have their fraud experts
12 develop that.

13 Q. Okay. So their fraud experts would look
14 at their overall universe of fraud loss and make
15 their determination of what fraud they think a -- an 10:18:37
16 EMV chip would have prevented; correct?

17 A. Correct. And then we would vet that --
18 they would vet that with -- in the U.S. they would
19 vet that with their various issuers. We would vet
20 it against industry information. So if we had 10:18:50
21 questions, we'd push back.

22 Q. But just your starting point is working
23 with data that they gave you?

24 A. Exactly.

25 Q. Okay. And you were not doing your own 10:19:05

1 analysis of clients' fraud loss data to determine
2 what portion of that loss would have been avoided by
3 an EMV chip; correct?

4 A. I am relying on the starting point is --
5 is the client's own internal data. 10:19:20

6 Q. Have you ever worked with any client on
7 the actual implementation of EMV chip technology for
8 a program?

9 A. No. It gets into the -- mostly the
10 technical side of it, and I am not a technical -- 10:19:39
11 I'm a -- I'm a business strategy/product innovation
12 kind of person.

13 Q. Okay. Is there a particular methodology
14 that the business case model follows?

15 A. I know -- I mean, it follows business case 10:20:04
16 methodology that, you know, is typical for any kind
17 of business case.

18 But there's no -- you can't go Google it
19 up and come up with a methodology. That -- it -- it
20 was something that we created to fit the 10:20:18
21 circumstances of the decision being made.

22 Q. Okay. It was created at Edgar Dunn?

23 A. Yes.

24 Q. Are you aware of whether any other
25 companies or anyone else in the industry was using 10:20:30

1 Q. Okay. Did that work involve any EMV chips
2 or card technology?

3 A. It was pre-EMV.

4 Q. Okay. And any -- no experience running a
5 government benefits card program? 10:29:46

6 A. No.

7 Q. Did you have any experience with payment
8 cards or payment card programs during the COVID-19
9 pandemic?

10 A. I was retired during the COVID-19 10:30:01
11 pandemic.

12 Q. So you -- you testified that you have
13 been -- you've been deposed in six cases.

14 Were all of those as an expert witness?

15 A. Yes. 10:30:16

16 Q. How many other cases have you been
17 retained as an expert for in which you did not
18 testify?

19 A. I've been -- well, I had two others that I
20 testified, not in deposition, but in mediation or 10:30:32
21 arbitration.

22 In total, I've done 12 cases. So there
23 were four, I guess. Is that right? There were
24 six -- yeah, so four that I didn't testify at all.

25 Q. Okay. And we've talked about one of those 10:30:49

10:35:05

10:35:14

10:35:27

10:35:37

5 Q. Is there anything that you were asked to 10:36:10

6 consider at any point that did not make it into one

7 of your reports?

8 MS. C. CHAN: Objection. Vague.

9 Confusing.

10 THE WITNESS: Yeah, I don't -- I don't 10:36:22

11 know how to -- I can't think of an answer to that,

12 so...

13 BY MS. Y. CHAN:

14 Q. Sure.

15 Are there any topics or questions that you 10:36:28

16 were asked to opine on that you did not address in

17 your reports?

18 A. I don't think so, no.

19 Q. Okay. Are there any opinions that you

20 have developed or offered at any point after you 10:36:42

21 were retained that did not make it in -- into one of

22 your reports?

23 A. I don't think so.

24 Q. Okay. Any opinions that you put in an

25 initial draft, for example, that you then took out? 10:36:55

1 MS. C. CHAN: Objection.

2 THE WITNESS: I don't think so.

3 BY MS. Y. CHAN:

4 Q. Okay. Let me show you what we've
5 premarked as Exhibits 1 and 2. These are your two 10:37:10
6 reports in this case.

7 And did you draft these reports?

8 A. Yes, I drafted these reports.

9 Q. Okay. Did anyone help you?

10 A. Well, I drafted them and worked with my 10:37:25
11 attorneys here to edit and refine and -- but
12 everything is, you know, subject to my final
13 approval.

14 Q. Yeah. Did anyone else other than the
15 attorneys help you with the report? 10:37:39

16 A. No.

17 Q. Okay. Did anyone rewrite any portions of
18 your reports?

19 A. No. I mean, my -- the edits would have
20 rewritten pieces, but those I reviewed and made 10:37:49
21 share I was totally comfortable with.

22 Q. Did any of those edits change the
23 substance of your opinion?

24 A. No. They just helped it communicate
25 better. 10:38:03

1 Q. Okay. Did any of those edits change the
2 nature of the opinion?

3 A. No.

4 Q. Okay. Did any of those edits add a new
5 opinion that you had not included in a prior draft? 10:38:09

6 A. I don't think so. I think we refined it
7 also as we went through the process to reflect what
8 we were learning through the other -- through the
9 exchange of documents, so...

10 Q. And you also submitted two declarations in 10:38:28
11 con- -- in connection with the class certification
12 briefing in this case.

13 Do you recall that? Not -- not the one --

14 A. I'm just looking at what you had, to see
15 what you have here. 10:38:43

16 Yes, there was a -- a -- a -- a report for
17 class certification.

18 Q. Okay. And did you draft those two
19 declarations?

20 A. Yes. 10:38:51

21 Q. Did anyone help you with those?

22 A. The same as with these.

23 Q. Okay. Have you reviewed those recently?

24 A. I looked at them some in the last few
25 days. 10:39:00

1 Q. Is there anything that you offered in
2 those class cert declarations that you want to
3 change now or that you now disagree with?

4 A. I don't think so.

5 Q. Okay. Have any of those opinions changed? 10:39:13

6 A. I don't think so, no.

7 Q. And did you review the two reports in
8 front of you in pre- -- in preparation for today?

9 A. Yes.

10 Q. Did you see anything in there that you 10:39:25
11 wanted to correct or change?

12 A. No.

13 Q. Okay. What else did you do in preparation
14 for this deposition?

15 A. Oh, I read through some of the documents 10:39:34
16 that are cited. I did a prep session with the
17 attorneys on Monday. And just reviewed materials.

18 Q. Did you speak with anyone other than the
19 attorneys in preparation for this deposition?

20 A. No. 10:40:01

21 Q. Did you speak with any of the other expert
22 witnesses in this case?

23 A. No.

24 Q. Have you ever spoken with any of the other
25 expert witnesses in this case? 10:40:07

1 Q. Okay. So when you -- when you had that
2 initial conversation with him, did you tell him what
3 kinds of opinions you thought he could contribute to
4 the case?

5 A. No. 10:41:43

6 Q. Okay. Have you spoken with any of the
7 Plaintiffs in this case?

8 A. No.

9 Q. Did you ever ask to speak with any of the
10 Plaintiffs in this case? 10:41:51

11 A. No.

12 Q. Why not?

13 A. I didn't feel like I needed to.

14 Q. Did you review any of the Plaintiffs'
15 files, any of their records? 10:42:00

16 MS. C. CHAN: Objection. Vague.

17 THE WITNESS: No. I mean, I've read
18 the -- was it -- one of the documents that
19 summarizes all of the Plaintiffs and their stories.

20 BY MS. Y. CHAN: 10:42:18

21 Q. The Complaint or one of the versions of
22 the Complaint?

23 A. Yeah, that's probably what it is. It's a
24 big...

25 Q. Yeah. It's probably the Complaint. 10:42:24

1 CERTIFICATE OF REPORTER

2 I, Hanna Kim, a Certified Shorthand
3 Reporter, do hereby certify:

4 That prior to being examined, the witness
5 in the foregoing proceedings was by me duly sworn to
6 testify to the truth, the whole truth, and nothing
7 but the truth;

8 That said proceedings were taken before me
9 at the time and place therein set forth and were
10 taken down by me in shorthand and thereafter
11 transcribed into typewriting under my direction and
12 supervision;

13 I further certify that I am neither
14 counsel for, nor related to, any party to said
15 proceedings, not in anywise interested in the
16 outcome thereof.

17 Further, that if the foregoing pertains to
18 the original transcript of a deposition in a federal
19 case, before completion of the proceedings, review
20 of the transcript [X] was [] was not requested.

21 In witness whereof, I have hereunto
22 subscribed my name.

23 Dated: June 25, 2025.

24 

25 Hanna Kim CLR, CSR No. 13083
