13 HIGHLY CONFIDENTIAL  
14 VIDEO-RECORDED DEPOSITION OF GREG REGAN

15  
16 Monday, May 19, 2025  
17 San Francisco, California  
18

19  
20  
21  
22  
23 Stenographically Reported By:  
24 Hanna Kim, CLR, CSR No. 13083  
25 Job No. 7289038

Page 1

1 BY MR. RIFFEE:

2 Q. Did you review the circumstances of any of  
3 the particular plaintiffs or proposed class members  
4 to assess whether they actually were harmed in that  
5 amount, that they actually incurred a 20 percent APR 11:03:21  
6 or -- or similar interest rate?

7 MS. CHAN: Objection.

8 THE WITNESS: No. My objective was to  
9 develop an understanding of the class and identify  
10 the harms that -- that I observed and those harms 11:03:34  
11 that were alleged, and attempt to quantify that  
12 harm on -- on a class-wide basis so that damages  
13 could be reasonably measured in the aggregate. And  
14 doing that at the individual level, I concluded,  
15 would not yield a result that could be reasonably 11:03:56  
16 extrapolated. So my -- my objective was to look at  
17 the class as a whole and attempt to identify a  
18 method to measure damages on a class-wide basis?

19 BY MR. RIFFEE:

20 Q. In any of those cases, did you review on 11:04:10  
21 an individual level or a sample to assess whether,  
22 in fact, any persons in -- in your proposed classes,  
23 or plaintiffs, actually incurred borrowing costs  
24 at -- at a -- at that interest rate or at a similar  
25 interest rate? 11:04:26

Page 45

1 MS. CHAN: Objection.

2 THE WITNESS: Do you mind just reading the  
3 question back? I just lost when you were reading.  
4 Sorry.

5 BY MR. RIFFEE: 11:04:34

6 Q. Sure.

7 In any of those cases, did you review --

8 A. You can ask a different question.

9 Q. Sure. Yeah, no.

10 In any of those cases, did you review any 11:04:47

11 information concerning the actual plaintiffs or a  
12 sample of the actual plaintiffs or proposed classes  
13 to see -- to check your work to see if they actually  
14 did appear to have incurred borrowing costs at or  
15 near the -- the interest rate that you were using to 11:05:04  
16 calculate your damages at the 20 -- for example, a  
17 20 percent APR?

18 MS. CHAN: Objection. Compound, assumes  
19 facts.

20 THE WITNESS: Every case is unique, and so 11:05:18

21 certain instances lend themselves -- for example, a  
22 small group of plaintiffs or a individual plaintiff  
23 or company, then that type of analysis is possible;  
24 where here, a large group of plaintiffs exist, the  
25 approach that I performed was to analyze the most 11:05:37

1 common harm and attempt to identify a cost that most  
2 reason- -- reasonably captured that harm.

3 BY MR. RIFFEE:

4 Q. In past cases where you've used a compound  
5 interest rate to assess potential borrowing costs, 11:05:57  
6 was there ever an instance where you didn't review  
7 information concerning your proposed class or set of  
8 plaintiffs to -- sorry -- to verify that some of  
9 them actually incurred the borrowing costs that you  
10 were assuming in your methodology? 11:06:18

11 MS. CHAN: Objection. Vague. Compound.

12 THE WITNESS: I -- I'm certain there have  
13 been. I think that what I attempted to do in this  
14 instance was to identify attributes of the consumers  
15 and develop an understanding of common economic 11:06:36  
16 circumstances confronting that type of consumer at  
17 the particular time at issue, and associate that  
18 with the process to identify the interest rate I  
19 used to measure the harm.

20 BY MR. RIFFEE: 11:06:56

21 Q. Okay. In this case, you don't know  
22 whether any particular class member actually  
23 incurred the -- the 20 percent APR interest that you  
24 calculate in your methodologies; correct?

25 MS. CHAN: Objection. 11:07:11

1 THE WITNESS: I believe the -- given the  
2 nature of the class, that it -- that type of harm  
3 was -- was incurred by individual consumers. And  
4 that conclusion's consistent with Dr. East and  
5 Dr. Levine's findings. 11:07:25

6 BY MR. RIFFEE:

7 Q. Have you reviewed any evidence to confirm  
8 that even one single proposed class member actually  
9 themselves incurred interest at, at least a  
10 20 percent interest rate? 11:07:36

11 MS. CHAN: Objection.

12 THE WITNESS: It's my expectation that  
13 there are consumers that experience costs that  
14 exceed that. The objective of illustrating my  
15 analysis using a 20 percent rate was to identify a 11:07:49  
16 median type of harm that was incurred by consumers  
17 and measure it in that -- in that way.

18 BY MR. RIFFEE:

19 Q. That wasn't -- that wasn't my question.  
20 So I understand that's your expectation, 11:08:03  
21 but did you review any evidence to confirm that  
22 anyone actually did -- in the proposed classes or  
23 any of the -- the class plaintiffs actually incurred  
24 borrowing costs at a 20 percent interest rate or  
25 higher? 11:08:16

1 MS. CHAN: Objection. Vague.

2 THE WITNESS: I did not do it at an  
3 individual level because I didn't have data to  
4 indicate that that outcome would be reasonably  
5 extracted to the population as a whole. So what I 11:08:35  
6 did was to develop my understanding of the overall  
7 population of consumers.

8 BY MR. RIFFEE:

9 Q. And that was based on your research and --  
10 and information generally, but not specific to 11:08:45  
11 the -- the actual class members; correct?

12 MS. CHAN: Objection.

13 THE WITNESS: It was my research regarding  
14 the typical type of harm incurred by members of the  
15 proposed class. 11:08:58

16 BY MR. RIFFEE:

17 Q. Have you ever been retained, prior to this  
18 case, to calculate damages concerning the denial of  
19 unauthorized transaction claims?

20 A. I -- I don't believe so. 11:09:09

21 Q. Have you ever been retained to calculate  
22 damages concerning an account freeze or similar  
23 restriction placed on a financial account that  
24 prevented an accountholder from accessing the funds  
25 in that account? 11:09:41

1 hear you, Counsel.

2 MS. CHAN: Sorry. Confusing.

3 THE WITNESS: I think I understand your  
4 question. But I'm implementing, through the bank's  
5 data, my understanding of the allegation. So as -- 11:51:15  
6 I'm not opining about the nature of the conduct.

7 BY MR. RIFFEE:

8 Q. Sure.

9 A. But I am applying my understanding of the  
10 conduct to do the analysis. 11:51:27

11 Q. Thank you. That -- that was my -- the  
12 intent of my question. Thank you.

13 And your -- the damages, methodologies --  
14 or at least the damages sought -- your understanding  
15 of the damages sought, that's described in the table 11:51:42  
16 that you have here on page 4 and 5?

17 A. Yes.

18 Q. And if you could turn back to -- I guess  
19 it's all on page 3. At the top of page 3, there's a  
20 chart. This is your understanding of the proposed 11:52:05  
21 class definitions in this case; right?

22 A. Yes.

23 Q. Did you have any input into how these five  
24 proposed classes would be defined?

25 A. I don't know if I can answer that question 11:52:16

1 other than responding to data-related questions as  
2 to what was available on -- on given dates.

3 Q. Are you relying entirely on counsel for  
4 these definitions?

5 A. I am. 11:52:40

6 Q. Did you have any input into who would be  
7 included in each proposed class, other than  
8 reviewing and -- and conducting data analysis based  
9 on the data provided to you from Bank of America?

10 MS. CHAN: Objection. Ambiguous. 11:52:58

11 THE WITNESS: It was my goal to implement  
12 my understanding of these definitions in terms of  
13 identifying proposed class members.

14 BY MR. RIFFEE:

15 Q. Did you have any input regarding who would 11:53:13  
16 be excluded from each class -- or each proposed  
17 class, other than by conducting an analysis of the  
18 data that was provided to you by Bank of America?

19 MS. CHAN: Objection. Vague and  
20 ambiguous. 11:53:28

21 THE WITNESS: I would consider input in  
22 terms of understanding who was excluded for purposes  
23 of the remediation plan, then reading the  
24 interrogatories and, I think, you know, Mr. Martin's  
25 declaration, for example, to develop an 11:53:45

1 cardholders based on instruction from counsel;  
2 correct? The -- the cardholders that are described  
3 here in footnote 10.

4 A. I think, ultimately, that's a fair  
5 characterization. 11:55:29

6 Q. Do you have an understanding of why this  
7 criteria is being used to exclude cardholders from  
8 plaintiffs' proposed classes?

9 MS. CHAN: Objection.

10 THE WITNESS: I don't think I can have a 11:55:45  
11 complete understanding because it appears to reflect  
12 some negotiations between the bank and its  
13 regulators, but I have a general understanding of  
14 the -- of the aim to exclude individuals suspected  
15 of engaging in fraudulent conduct. 11:55:58

16 BY MR. RIFFEE:

17 Q. Do you have an opinion as to whether these  
18 exclusion criteria described in footnote 10 are  
19 appropriate for the purposes of your damages  
20 methodologies? 11:56:15

21 MS. CHAN: Objection. Vague. Beyond  
22 scope.

23 THE WITNESS: I -- I didn't form an  
24 opinion on that topic, but I don't see it as  
25 unreasonable to make these exclusions. 11:56:24

18 MS. CHAN: Objection. Vague. Compound.

19 THE WITNESS: Well, I'd have to see what

20 data became available to allow me to conduct that 12:11:50

21 analysis and even ascertain whether it should be

22 applied more broadly. But not knowing what that

23 analysis might look like, if the bank simply added

24 these card alias IDs to its list of excluded

25 accounts, then I would use that data to exclude 12:12:10

Page 84

12 MS. CHAN: Objection. Beyond scope.

13 THE WITNESS: That wasn't the nature of my

14 assignment.

15 BY MR. RIFFEE: 12:26:14

16 Q. You're just drawing on information

17 provided by Bank of America in its interrogatory

18 responses; correct?

■ ■ [REDACTED]

■ [REDACTED] [REDACTED]

■ [REDACTED]

22 Q. Okay. But you don't -- you don't have an  
23 understanding, and you haven't reviewed anything to  
24 determine what, if anything, ED did -- EDD did to  
25 verify those claims? 12:26:39

1 MS. CHAN: Objection. Asked and answered.  
2 Beyond scope.

3 THE WITNESS: That was not the nature of  
4 my assignment.

15 BY MR. RIFFEE: 12:27:22

16 Q. Are you aware that there are reports of  
17 significant unauthorized transaction claims fraud,  
18 sometimes referred to as double-dipping, that  
19 occurred during the proposed class periods?

20 MS. CHAN: Objection. Assumes facts. 12:27:33  
21 Misleading. Outside scope.

22 THE WITNESS: I'd have to look at how  
23 double-dipping was characterized in the document,  
24 but I'm aware of claims of fraudulent activity  
25 occurring. 12:27:53

1 cardholder was damaged at the time of, in this case,  
2 the claim denial; and until the time at which the  
3 cardholder was compensated for that damage, he or  
4 she remained damaged. But that that amount that the  
5 bank has paid is essentially a partial payment of 01:41:21  
6 the judgment that reduces those damages.

7 Q. Okay. So if we could turn back to page 4  
8 and the chart where you include the class  
9 definitions -- sorry, Paragraph 4, page 3, the chart  
10 where you include the class definitions. 01:41:47

11 So for the claim denial class, you  
12 understand that it's defined by plaintiffs to  
13 include all -- EDD cardholders who notified Bank of  
14 America of an unauthorized transaction on their  
15 prepaid debit card account and had that claim denied 01:42:07  
16 because -- based on the use of indicator 1 of the  
17 claim fraud filter; correct?

18 A. Yes.

19 Q. So the alleged conduct at issue is Bank of  
20 America's use of the claim fraud filter, and 01:42:26  
21 specifically indicator 1.

22 Is that consistent with your  
23 understanding?

24 A. Yes.

25 Q. So in a but-for world, but for Bank of 01:42:32

1 America's use of indicator 1 of the claim fraud  
2 filter to deny those cardholders' claims, the  
3 cardholder would have been reimbursed by the Bank of  
4 America for the amount of the alleged unauthorized  
5 transactions included in their claims; right? 01:42:51

6 A. Yes.

7 Q. Would you agree that if a cardholder's  
8 account was credited for the full amount of the  
9 alleged unauthorized transactions, they are then in  
10 the same place that they would have been in the 01:43:04  
11 but-for world, at least with respect to the  
12 principal amount of their claim?

13 A. Measured today, that would be a reasonable  
14 outlook. But what I'm talking about is the damage  
15 occurred at the time of the claim denial, and that 01:43:21  
16 person was damaged until the amount of the claim  
17 being refunded to the individual's account.

18 Q. Okay. The only difference between the  
19 card -- cardholder in the actual world where they  
20 have been reimbursed for their claim amount and in 01:43:36  
21 the but-for world is the timing of when they  
22 received the credit; right?

23 MS. CHAN: Objection.

24 BY MR. RIFFEE:

25 Q. Or the delay in -- in the receipt of -- of 01:43:46

1 the principal amount of their claim?

2 MS. CHAN: Objection.

3 THE WITNESS: The -- the difference is,  
4 again, the events that occurred on the date of the  
5 claim denial at that point in time, the cardholder 01:43:58  
6 did not know if or when the bank would refund the  
7 amount of that claim to that person's account.

8 During that period of time, in my view, the  
9 individual incurred consequential damages in the  
10 form of the time value of money. 01:44:20

11 And, later, the bank has at least  
12 partially paid that consumer; that amount would be  
13 offset to reduce the amount of damages, but doesn't  
14 change the fact that the individual had been damaged  
15 during the preceding period of time. 01:44:33

16 BY MR. RIFFEE:

17 Q. Okay. And we'll talk about it in a bit.

18 But you -- you have attempted to calculate  
19 consequential damages, which you say is the time  
20 value of money. Have you also attempted to 01:44:46  
21 calculate damages based on the time any cardholder  
22 spent or the steps they took to get their -- their  
23 claims reimbursed?

24 MS. CHAN: Objection. Ambiguous.

25 THE WITNESS: In -- in part, the customer 01:44:55

1 Q. Okay. Did you review any of the proposed  
2 class members' credit card balances -- revolving  
3 balances to determine whether they, in fact, had  
4 revolving balances at the time they were without  
5 access to their funds? 03:15:59

6 A. I did not attempt to do an individual  
7 analysis because I did not have data that would  
8 allow me to make a reasonable extrapolation. So I  
9 studied the characteristics of the population of  
10 proposed class members and looked at the 03:16:09  
11 information, including the studies and data that I  
12 highlighted in Paragraphs 40 to 43 of Exhibit 1, in  
13 reaching my conclusion that the cost of borrowing  
14 was the most appropriate way to measure  
15 consequential harm. And the most common way in 03:16:32  
16 which consumers were borrowing during this period of  
17 time was on a credit card, and I used a median  
18 applicable credit card rate, all of which struck me  
19 as an appropriate methodology to measure damages.

20 Q. And you also did not review any of the 03:16:56  
21 proposed class members' credit card balances or --  
22 or statements to determine whether they, in fact,  
23 actually relied on a credit card or used credit  
24 cards to cover any funds that they may not have been  
25 able to access during this period; right? 03:17:13

1 A. I did not review individual credit card  
2 statement balances.

3 Q. And each of these studies -- none of them  
4 are specific -- that you relied on in your report  
5 and cited in your report, none of them are specific 03:17:24  
6 to this particular set of proposed class members;  
7 correct?

8 MS. CHAN: Objection. Ambiguous.

9 THE WITNESS: Actually, I think that, for  
10 example, the Department of Labor study of 03:17:33  
11 unemployment benefit recipients in California in  
12 which -- I think it was 97 percent of consumers  
13 surveyed said that those benefits were important to  
14 be able to meet their then-current financial needs.  
15 I think there was a CFPB study I cited reaching 03:17:53  
16 similar conclusions, along with the bank's testimony  
17 that these were vulnerable people that were  
18 withdrawing their funds upon receipt. And that's  
19 consistent with, for example, the study from the  
20 Federal Reserve cited in Paragraph 42 of my report, 03:18:12  
21 that the consequence of not having those funds  
22 available was incurring costs of borrowing.

23 So those studies, I think, were targeted.  
24 They were aligned with the specific class of people  
25 that I'm trying to measure damages for. 03:18:29

1 BY MR. RIFFEE:

2 Q. You haven't done that to date; right?

3 A. I understand that's a small population of  
4 people, and I don't have a reasonable basis to think  
5 that their circumstances are representative of the 03:30:31  
6 class as a whole, which is much larger.

7 Q. Do you know if any particular cardholder  
8 in plaintiffs' proposed classes even had a credit  
9 card during the period when they were without access  
10 to the claim amount or the funds in their account? 03:30:53

11 A. It's my understanding -- I think we just  
12 went through this a few moments ago -- from -- from  
13 counsel as well as from looking at Mr. Stango's  
14 report that certain of the individuals did -- did  
15 have credit cards during the time period. 03:31:10

16 Q. Are you aware that other individual  
17 plaintiffs and certain class member -- or  
18 class representatives testified that they did not  
19 have a --

20 THE COURT REPORTER: Counsel, slowly. 03:31:18

21 MR. RIFFEE: I'm sorry.

22 BY MR. RIFFEE:

23 Q. Are you aware that other individual  
24 plaintiffs or class plaintiffs testified that they  
25 did not have a credit card during the pandemic or 03:31:27

1 during the period when they were without access  
2 to -- to certain funds?

3 MS. CHAN: Objection. Asked and answered.

4 THE WITNESS: I -- I am aware of that.

5 And my analysis doesn't necessitate that every 03:31:37  
6 single class member had a credit card. My  
7 assessment is that credit card borrowing was the  
8 most common form of borrowing during the period of  
9 time, and the cost of borrowing on a credit card is  
10 an appropriate approximation of the consequential 03:31:53  
11 harm experienced by class members.

12 BY MR. RIFFEE:

13 Q. Okay. But when your methodology is  
14 calculating consequential damages for each proposed  
15 class member, your methodology is necessarily 03:32:04  
16 assuming that each of them incurred the same  
17 interest rate of 20 percent APR, as if they had a  
18 credit card; correct?

19 MS. CHAN: Objection.

20 THE WITNESS: It's assuming that 03:32:14  
21 20 percent cost of borrowing is a median cost, which  
22 necessarily understates the typical average cost,  
23 because a mean, for example, would incorporate the  
24 impact of outliers that borrowed on -- on payday  
25 loans or other factors that we can observe in the 03:32:32

1 pandemic and received unemployment insurance tended  
2 to earn less than the median wage.

3 What steps, if any, did you take to verify  
4 that members of the proposed claim denial, credit  
5 rescission, account freeze or EMV chip classes, in 03:36:17  
6 fact, earned less than the median wage?

7 A. I think we've gone through this a large  
8 number of times. I'm looking at a group of  
9 California individuals in a specific period of time,  
10 2020 and 2021 generally, that incurred a loss of 03:36:37  
11 employment and obtained unemployment insurance. If  
12 I said loss of unemployment -- I'm -- I think I did.  
13 Loss of employment -- and attempting to gauge the  
14 circumstances of that group -- group of people. And  
15 based upon the data available to me, collectively, 03:37:01  
16 it indicated that these individuals were -- were  
17 vulnerable, including by the fact that they earn  
18 than less than the median wage, and that was  
19 consistent with my observations of the testimony of  
20 the bank's representatives, that these people were 03:37:17  
21 under significant financial duress at this moment in  
22 time.

23 Q. Did you review any data regarding the  
24 actual wage that the proposed class members earned  
25 prior to becoming unemployed? 03:37:35

Page 189

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

9 Q. Again, you have not reviewed any data for  
10 these proposed class members showing what their wage 03:39:34  
11 actually was prior to becoming unemployed, or what  
12 their available savings or checking account or  
13 alternative -- alternative income sources were at  
14 the time they were without their funds; correct?

15 MS. CHAN: Objection. Asked and answered. 03:39:53

16 THE WITNESS: I have not reviewed specific  
17 information for individual plaintiffs, but rather  
18 I'm looking at the population of impacted  
19 cardholders and gathering data to indicate what  
20 their circumstances were in the moment that the harm 03:40:07  
21 was incurred.

22 BY MR. RIFFEE:

23 Q. Okay. Do you agree that each of the  
24 proposed class member's fact and circumstances would  
25 be different? 03:40:18

1 MS. CHAN: Objection. Vague.

2 THE WITNESS: I think the individual  
3 plaintiffs are reflective of some portion of the  
4 class as a whole, which is what the data I'm using  
5 is designed to indicate. 03:40:41

6 BY MR. RIFFEE:

7 Q. Some of the proposed class members would  
8 have received higher than the median wage prior to  
9 applying for unemployment benefits; right?

10 Do you dispute that? 03:40:55

11 MS. CHAN: Objection.

12 THE WITNESS: Can -- can you repeat that?

13 BY MR. RIFFEE:

14 Q. Sure.

15 Would you agree that some of the proposed 03:40:59  
16 class members received higher than the median wage  
17 prior to applying for unemployment benefits?

18 A. I don't have all their data in front of  
19 me. That sounds reasonable.

20 Q. Okay. Do you speak -- dispute reports -- 03:41:15  
21 are you aware of reports that higher-income  
22 individuals were able to and did collect  
23 unemployment income during the pandemic, including  
24 millionaires?

25 MS. CHAN: Objection. 03:41:28

1 THE WITNESS: The millionaire point is  
2 in -- a complete outlier, though people earning  
3 above the median wage were able to collect  
4 unemployment benefits.

5 BY MR. RIFFEE: 03:41:40

6 Q. And sticking with Paragraph 42, you note  
7 that one of the bases for your assumption is that --  
8 or that they relied on credit card -- increased  
9 credit card utilization, is that -- looking at the  
10 top of page 18, "Many families have little to no 03:42:08  
11 financial cushion," and you cite a Federal Reserve  
12 study for that.

13 Would you agree that there's a  
14 considerable variation across households in the  
15 amount of liquid savings or available cash they may 03:42:26  
16 have for unanticipated expenses?

17 MS. CHAN: Objection. Vague.

18 THE WITNESS: I don't know what you mean  
19 by "considerable variability," but the study does  
20 indicate that there are categories of financial 03:42:35  
21 cushion that consumers do have.

22 BY MR. RIFFEE:

23 Q. Okay. But would you agree that there is  
24 variability across households in the amount of  
25 liquid savings or cash that they may have for 03:42:46

1 unanticipated expenses?

2 A. I will agree with that. The study at  
3 issue here is looking at -- at all consumers, so  
4 it's not sufficiently tailored to the population of  
5 individuals that are impacted by the wrongful claim 03:43:00  
6 denial. But it's informative to the overall level  
7 of data we have regarding these consumers.

8 Q. Did you review any data or information  
9 regarding the proposed class members or class  
10 plaintiffs to assess whether or not they had 03:43:22  
11 adequate savings to cover expenses while they -- a  
12 time -- during the time when they were without their  
13 claim amount or their account balance, such that  
14 they wouldn't need to borrow or increase their  
15 credit card utilization? 03:43:38

16 A. Can you read it one more time?

17 Q. Did you review any data or information  
18 regarding the proposed class members or class  
19 plaintiffs to assess whether or not they had  
20 adequate savings to cover expenses during the time 03:43:53  
21 when they were without their claim amount or their  
22 account balance, such that they wouldn't need to  
23 borrow or increase their credit card utilization?

24 MS. CHAN: Objection. Compound.

25 THE WITNESS: My process was to look at 03:44:06

21 Q. Okay. But you yourself -- you did not  
22 review any data to assess the financial cushion that  
23 these individual proposed class members or their  
24 families had or their withdrawal patterns; right?

25 MS. CHAN: Objection. Asked and answered. 04:06:12

1 THE WITNESS: I determined that the data  
2 from individuals was not deep enough. It was not --  
3 I didn't have enough data to be able to substantiate  
4 a conclusion that that information could be  
5 reasonably extrapolated. 04:06:31

6 BY MR. RIFFEE:

7 Q. Does your methodology consider whether  
8 proposed class members or class representative --

9 THE COURT REPORTER: I'm sorry, can you  
10 start that over?

11 MR. RIFFEE: Yeah. I apologize. I'm  
12 starting to get too fast.

13 BY MR. RIFFEE:

14 Q. Does your methodology consider whether  
15 proposed class members or class representatives 04:06:43  
16 could have or did borrow or receive gifts from  
17 friends or fam- -- friends or family to cover the  
18 value of the claim amount or the account balance  
19 that they may have been without for a period of  
20 time? 04:06:58

21 MS. CHAN: Objection. Compound.

22 THE WITNESS: Yes. This analysis, it does  
23 accomplish that. It does consider that there can be  
24 an attendant cost of borrowing in that fashion that  
25 you just described. And looking at the available 04:07:19

1 financial cushions and how consumers would  
2 responsible to that particular situation, in my  
3 view, this methodology best supported what a typical  
4 class member would do. And in my opinion, based  
5 upon review of Ms. East's and Mr. Levine's, they -- 04:07:35  
6 they reached similar conclusion.

7 BY MR. RIFFEE:

8 Q. Is it your opinion that the attendant  
9 costs of an individual who borrows, for example, a  
10 thousand dollars from their grandfather to cover 04:07:46  
11 their rent during the period when they're without  
12 funds, that that -- the cost of that could be  
13 measured by a 20 percent interest rate, as you  
14 calculate in your report?

15 A. In your hypothetical, the grandfather 04:08:00  
16 could have charged an interest rate to that  
17 individual. I know if I borrow money from my dad,  
18 he charges me interest.

19 So it could very well accomplish that  
20 objective. 04:08:11

21 Q. But you don't know if they did; right?

22 A. Again, that's why I didn't base my  
23 analysis on the hypothetical implications of an  
24 individual situation, but rather looked to the class  
25 as a whole and developed an expectation of what the 04:08:23

1 regarding the likely actions of the individuals but  
2 for the claim denial or account freeze.

3 Q. If you could turn to Paragraph 51 of your  
4 report.

5 You write in the first sentence, "In my 04:33:39  
6 opinion, these calculations are reasonable and  
7 conservative because the median duration of the  
8 claim denial was 87 days. The duration indicates  
9 that the impacted cardholders' ability to repay  
10 their existing balance would have been constrained 04:33:58  
11 during this time."

12 Did you also calculate the median duration  
13 of the freeze period for the account freeze class?

14 A. Yes.

15 Q. Do you recall what that was? 04:34:05

16 A. I recall that it was longer. I identify  
17 that in the report.

18 Q. It looks like in Paragraph 82 you  
19 explained how you did the calculation for an  
20 individual cardholder. But you believe in your 04:34:35  
21 report it also contains the median number of days  
22 that the account freeze proposed class was without  
23 funds?

24 A. I use a different statistic in the body of  
25 Paragraph 83. 04:34:55

1 Q. Okay.

2 A. Indicating 72 percent of the account  
3 freeze -- accounts were frozen for more than  
4 30 days.

5 Q. Which would mean that 28 percent of the 04:35:09  
6 accounts was frozen for less than 30 days?

7 A. Yes. If you give me a second. I want to  
8 say I presented this data.

9 Q. Looking at Paragraph 83.

10 So for the 28 percent of EDD accounts that 04:35:45  
11 were frozen for less than 20 -- or less than  
12 30 days, you still calculated consequential damages  
13 for each of those accounts, assuming that they  
14 borrowed at a 20 percent interest rate; correct?

15 A. Yes. 04:36:06

16 Q. How long is a typical credit card billing  
17 cycle?

18 THE COURT REPORTER: I'm sorry, billing  
19 cycle?

20 MR. RIFFEE: Billing cycle. 04:36:18

21 THE WITNESS: Approximately 30 days.

22 BY MR. RIFFEE:

23 Q. Okay. And how long does a credit  
24 cardholder typically have to pay their bill once  
25 it's been issued? 04:36:28

1 A. Approximately 10 to 15 days, something  
2 like that.

3 Q. You think their credit card payment after  
4 a bill is issued -- that they have 10 to 15 days to  
5 submit a payment, on average? 04:36:40

6 A. I have to look -- I have to look at the  
7 typical term, but I -- somewhere in that order of  
8 magnitude. Maybe up -- 20-something days.

9 Q. Would you agree that if a consumer's  
10 without access to -- to funds for a week, they may 04:36:54  
11 choose to use a credit card as a substitute for  
12 their funds, they would be able to make a credit  
13 card payment as they ordinarily would when it came  
14 due at the end of their billing cycle, once they  
15 regained those funds, within a week? 04:37:15

16 MS. CHAN: Objection. Incomplete  
17 hypothetical.

18 THE WITNESS: I'm sorry, can you say --  
19 BY MR. RIFFEE:

20 Q. Yeah. 04:37:33

21 Would you -- from a -- from an economist's  
22 perspective, if an individual was without funds for  
23 one week and they choose to use a credit card in  
24 that one week, not knowing if they were going to get  
25 the funds get, then all of a sudden they get the 04:37:44

1 funds back a week later, the but-for cause of any  
2 interest that they may incur is not -- would not be  
3 the fact they didn't have funds for a week, because  
4 they would have had the funds in time to pay off  
5 that credit card by the time the statement became 04:37:57  
6 due?

7 MS. CHAN: Objection. Incomplete  
8 hypothetical.

9 THE WITNESS: To the extent that the  
10 consumer's balance wasn't revolving, that would 04:38:07  
11 be -- that could be the case.

12 But my analysis doesn't assert that a  
13 credit card was used in every transaction. It's  
14 assuming that the most common form of borrowing was  
15 on a credit card, and the cost of borrowing in that 04:38:21  
16 situation was 20 percent.

17 BY MR. RIFFEE:

18 Q. Okay. But your analysis does assert that  
19 every individual, even if they had -- were without  
20 funds in their account for 30 days or less -- 04:38:34  
21 without accounts for 2 weeks or less -- or funds in  
22 their account for 2 weeks or less, less than a  
23 typical credit card billing cycle, that your  
24 methodology would calculate the but-for  
25 consequential damages to be the 2-week period when 04:38:51

1 they were without funds in their account; is that  
2 correct?

3 A. Yes, because the consumer was harmed when  
4 the bank withheld their funds during that period of  
5 time. They might have borrowed on a credit card. 04:39:06  
6 They might have reduced consumption or foregone some  
7 other element that they did not choose to have to  
8 encumber as a result of the harm that was incurred.

9 And I think that Dr. -- Ms. -- Ms. East  
10 and Mr. Levine measure harm similarly. They -- they 04:39:20  
11 indicate that the cost would be higher in those  
12 particular circumstances.

13 So I think that the measurement of harm  
14 during that period of time is -- is consistent with  
15 doing so at 20 percent. 04:39:33

16 Q. But the methodology that you propose in  
17 your report and that you use to calculate  
18 consequential damages for each of the classes, other  
19 than the customer service class, assumes that each  
20 borrowed at a 20 percent interest rate; correct? 04:39:45

21 MS. CHAN: Objection.

22 THE WITNESS: As a way of measuring the  
23 harm. There are other ways in which the harm could  
24 have been incurred that were even more expensive,  
25 based upon my analysis of Ms. -- Ms. East and 04:39:58

1           There are other costs incurred that we've  
2     discussed. If a consumer had to forego buying  
3     groceries for a week or had to delay a medical  
4     procedure, there -- there are costs attendant to  
5     that, that this measurement can be used to quantify     04:41:59  
6     the harm experienced by the consumer. And in that  
7     regard, I'm relying upon the analysis of Ms. --  
8     Ms. East and Mr. Levine.

9           Q. So you believe that your methodology is  
10    also proposing the costs of -- of -- or your     04:42:14  
11    consequential damages also calculate medical  
12    expenses?

13           MS. CHAN: Objection. Misstates  
14    testimony.

15           THE WITNESS: This is a conservative     04:42:20  
16    measurement because those other types of instances  
17    are associated with greater rates of harm. And so  
18    this median credit card rate of interest  
19    appropriately captures class-wide damages on an  
20    aggregate basis.     04:42:40

21           MR. RIFFEE: All right.

22           Let's mark as Exhibit 10, Tab 13.

23           THE COURT REPORTER: 13?

24           MR. RIFFEE: Yes.

25           (Regan Deposition Exhibit 10 was marked     04:42:54

1 purposes of calculating the cost of delayed benefits  
2 concentration harm here; right?

3 A. Yes.

4 Q. Sorry. It's hard to read with the green.

5 And then you estimate that approximately 05:06:14  
6 56 million of EDD benefits that EDD tried but was  
7 unable to deposit to accounts that were frozen based  
8 solely on application of its claim fraud filter --  
9 that -- that's the total that the bank rejected.

10 And the basis of that is cited in footnote 115; 05:06:31  
11 right?

12 A. Yes.

13 Q. Do you know whether that \$56 million of  
14 benefits payments -- whether that was intended  
15 solely for individuals that you've identified for -- 05:06:47  
16 to be in the proposed account freeze class, or  
17 whether it would be -- it may be broader and include  
18 people who are excluded from that class either by  
19 the definition or as you've applied the exclusions?

20 A. My recollection is it's broader, though I 05:07:06  
21 think I can figure that out.

22 Yes. My recollection is it's broader.

23 Q. Then in Paragraph 84, you say that, "The  
24 cost of delayed benefits can be calculated using the  
25 common methodology for all account freeze 05:07:37

1 members" -- "account freeze class members based on  
2 the amount of each class member's biweekly benefit  
3 payment and the length of the delayed receipt of  
4 their subsequent benefit payments."

5 Did you actually do those calculations in 05:07:49  
6 your report?

7 A. I did a calculation of the amounts using  
8 the average data available to me. I did not do the  
9 specific calculations at the individual level  
10 because the data wasn't available to me. 05:08:10

11 Q. And that's data showing each  
12 proposed class -- account freeze class member's  
13 biweekly payment period; right?

14 A. Yes.

15 Q. Do you believe that Bank of America or EDD 05:08:23  
16 have that data?

17 Or do you know if Bank of America and --  
18 or EDD have that data?

19 A. It -- it was my understanding that that  
20 data is available. I don't know if Bank of America 05:08:36  
21 has it as well as EDD, or some combination thereof.  
22 And I'm reluctant -- I shouldn't -- can't speculate  
23 because I know that I haven't seen the EDD  
24 deposition transcript.

25 Q. So sitting here today, you haven't 05:08:52

1 received or reviewed data showing each member's  
2 biweekly payment period; correct?

3 A. That's correct.

4 Q. You -- do you -- you also don't have data  
5 showing the length of the delayed receipt of each 05:09:06  
6 proposed account freeze class member's benefits  
7 payments; correct?

8 A. That's correct, that I do not have that  
9 data.

10 Q. Do you know if EDD or Bank of America has 05:09:18  
11 that information available for each of the proposed  
12 account freeze class members?

13 A. It -- it's my assumption that that data is  
14 available.

15 Q. Okay. Do you -- would you agree that the 05:09:30  
16 amount of time between when EDD would have credit --  
17 credited a cardholder's account -- prepaid debit  
18 card account and when the benefits checks actually  
19 reached the cardholder will vary by cardholder?

20 MS. CHAN: Objection. 05:09:59

21 THE WITNESS: Without the data, I don't  
22 think I can conclusively answer that question, which  
23 is why I'm looking for the data on the length of the  
24 delayed receipt.

25 BY MR. RIFFEE: 05:10:16

1 Q. How would EDD's data show the amount of  
2 time it actually took for the check that was sent by  
3 EDD if their benefits were converted to a check --  
4 the amount of time between when it was send and when  
5 it was actually received by the -- by the 05:10:31  
6 cardholder?

7 MS. CHAN: Objection.

8 THE WITNESS: I don't know that EDD's data  
9 would have that, but I think that that data could be  
10 estimated by the reasonable time of -- in post. 05:10:40

11 BY MR. RIFFEE:

12 Q. Okay. Would you agree that that would  
13 vary by cardholder, the amount of time that it would  
14 actually take a mailed check to -- to reach them or  
15 be accessed by them? 05:10:50

16 MS. CHAN: Objection.

17 THE WITNESS: I think any degree of  
18 variability would be minimal and could be  
19 appropriately estimated using -- using a median.  
20 BY MR. RIFFEE: 05:11:09

21 Q. Do you have any data available to you or  
22 have you reviewed any data to assess the median  
23 amount of time that it would take for EDD to mail a  
24 check to a cardholder and for a cardholder to  
25 actually receive that check? 05:11:26

1 A. Can -- sorry. Can you repeat that?

2 Q. Sure.

3 Do you cite any data or have you -- in  
4 your report or have you considered any data that  
5 would allow you to assess the median amount of time 05:11:34  
6 that it would take for EDD to mail a check and a  
7 cardholder to actually receive that check?

8 A. I believe that data is readily  
9 ascertainable.

10 What -- what I have hypothesized here 05:11:52  
11 is -- I need to look at the data that is actually  
12 available, and it may be the case that the  
13 estimation is made based upon the time at which the  
14 check was sent by EDD to the consumer impacted by  
15 the account freeze. I'd have to look at the data 05:12:12  
16 that becomes available.

17 Q. Okay. But, again, sitting here today,  
18 you -- you don't have access to that data, so you  
19 haven't done the -- the actual calculations; you  
20 just have an estimate in your report; correct? 05:12:20

21 A. At this time I'm relying on estimates  
22 based upon the bank's data.

23 Q. Your cost of delayed benefits calculations  
24 for the account freeze class, it assumes that every  
25 single member of the proposed account freeze class 05:12:35

1 was continuing to receive or would have continued to  
2 receive unemployment benefits during the period when  
3 their account was frozen; correct?

4 A. For those that had a delay longer than --  
5 than 50 -- 30 days, yes. 05:12:53

6 Q. Did you do anything to verify that all of  
7 the proposed account freeze class members were still  
8 eligible for and receiving additional EDD benefits  
9 payments at the time of or immediately after their  
10 account was frozen? 05:13:10

11 A. No. It's absent the data regarding the  
12 actual payment activity. It's an assumption.

13 Q. Okay. Would you agree that it's possible  
14 some of the proposed account freeze class members  
15 were no longer receiving ED- -- ED- -- EDD benefits 05:13:48  
16 during -- when their account was frozen perhaps  
17 because they became employed and were no longer  
18 eligible?

19 A. It is possible.

20 A different way to test for that would be 05:14:02  
21 to look at the -- the bank's data regarding the  
22 mediation -- remediation plan and its efforts to  
23 measure the -- the cost of the delayed benefits on  
24 a -- on a claimant basis. But -- but that is an  
25 assumption in my analysis, absent receipt of data 05:14:16

1 THE WITNESS: Can you clarify what you  
2 mean by --

3 BY MR. RIFFEE:

4 Q. Sure.

5 Do you intend to offer a legal opinion in 05:45:29  
6 this case as to whether or not any of the -- or  
7 disgorgement should be made available to the claim  
8 denial class members based on their claims?

9 A. No. My calculations assume that  
10 disgorgement is an available remedy. 05:45:46

11 Q. In Paragraph 61, at the end of the  
12 paragraph you say, "If the bank had not denied

13 [REDACTED]

14 [REDACTED]

15 [REDACTED]

[REDACTED]

16 [REDACTED]

17 [REDACTED]

18 And then you cite in footnote 85  
19 Mr. Chestnut's testimony, which you say is described  
20 above earlier in your report. 05:46:17

21 [REDACTED]

22 [REDACTED]

1 question. I'm sorry to make you repeat it, but --

2 Q. Of course.

3 A. -- if you could.

4 Q. For the purposes of your disgorgement

5 calculations and the profits that you believe Bank 05:51:36

6 of America obtained, do you consider the profits

7 that you calculated relative to the fraud losses

8 that Bank of America incurred once it reimbursed

9 each of the claim denial class members for the --

10 the full value of their claims? 05:51:56

11 A. I do not offset fraud losses. I think I

12 described that the way in which a disgorgement

13 calculation is prepared is, plaintiff identifies the

14 relevant revenue stream, and to the extent there's

15 additional cost to be deducted at that point, those 05:52:12

16 are identified by -- by the bank or by the

17 defendant's expert, and then I make an analysis of

18 that. I have -- I have not seen a quantification of

19 those costs to be deductible.

20 Q. Do you have an opinion as to whether or 05:52:26

21 not the -- the fraud losses or the costs that the

22 bank incurred to recredit, reimburse the proposed

23 claim denial class members should off- -- offset the

24 profits you calculated?

25 MS. CHAN: Objection. Vague. 05:52:43

1 THE WITNESS: I'd have to think about  
2 that. And I would have anticipated that Mr. Stango  
3 would -- would have addressed that particular point.  
4 So I can't answer as I sit here.

5 BY MR. RIFFEE: 05:52:57

6 Q. Your calculation of float revenue profits  
7 for the claim denial class begins the date the claim  
8 was denied; right?

9 A. Yes, based on my understanding of the  
10 wrongful conduct being the application of the claim 05:53:09  
11 fraud filter.

12 Q. So there's no offset or account for the  
13 ten-day period that EFTA or Regulation E would have  
14 allowed for Bank of America to issue a provisional  
15 credit but for the claim fraud filter; correct? 05:53:27

16 MS. CHAN: Objection.

17 THE WITNESS: That's correct, based upon  
18 my assumption regarding the date of the harmful act.

19 BY MR. RIFFEE:

20 Q. All right. 05:53:54

21 If you could turn to Paragraph 72 of your  
22 report, where you discuss the disgorgement of  
23 profits for the credit rescission class.

24 Is your calculation of the float revenue  
25 profits that you attribute to the proposed 05:54:07

1 Q. And here you assume -- or, actually,  
2 strike that.

3 We discussed earlier and you testified  
4 earlier that one of your basis for your assumptions  
5 for the cost of delayed benefits payments' 05:55:27  
6 consequential damages is that you understand that  
7 while the account freeze class members' accounts  
8 were frozen, their benefits, to the extent they were  
9 still receiving benefits, would've been converted to  
10 checks; right? 05:55:46

11 A. Yes.

12 Q. And you agree that while those accounts  
13 were frozen, those amounts that were converted to  
14 check, they were no longer being deposited by EDD  
15 into the prepaid cardholders' debit card accounts; 05:55:58  
16 right?

17 A. Yes.

18 Q. Those benefits would have been rejected --  
19 at least your understanding is that those benefits  
20 would have been rejected; right? 05:56:13

21 A. That's my understanding.

22 Q. So would you agree or you understand that  
23 Bank of America was not receiving -- did not receive  
24 float revenue on the additional benefits that were  
25 rejected and converted to -- to checks? 05:56:25

1 A. Yes.

2 Q. Does your disgorgement methodology attempt  
3 to account for offset for any additional float  
4 revenue that Bank of America would have accrued on  
5 additional EDD benefits loads to the proposed 05:56:42  
6 account -- freeze class members' accounts had they  
7 not been frozen during this time?

8 A. No. I don't think that's a proper way to  
9 do it.

10 Q. Why not? 05:56:53

11 A. Because a disgorgement is an accounting  
12 for the actual profits that the entity earned during  
13 the period of time. And that's conceptual profits  
14 related to monies that the bank didn't earn because  
15 of its harmful act practice. 05:57:08

16 Q. So it's your view that even though but for  
17 the alleged conduct -- if the bank would have earned  
18 more in float revenue but for its alleged conduct  
19 based on the continued benefits loads, that it's  
20 still appropriate to disgorge any profits that it 05:57:27  
21 obtained based on the frozen account balances?

22 MS. CHAN: Objection. Assumes facts.

23 THE WITNESS: The methodology to compute  
24 disgorgement, again, focuses on actual profits, what  
25 was the actual benefit that the defendant obtained 05:57:48

1 MR. RIFFEE: Of course.

2 BY MR. RIFFEE:

3 Q. Do you understand that he disputes that  
4 Mr. Minnucci's proposed industry-average ASA is an  
5 appropriate benchmark for Bank of America's claims 06:09:48  
6 call center during the proposed customer service  
7 class period?

8 A. That's my recollection.

9 Q. Do you have any reason to dispute Mr.  
10 Opinion -- Mr. Hindle's opinion? 06:10:02

11 MS. CHAN: Objection. Beyond scope.

12 THE WITNESS: Mr. Minnucci offered a  
13 rebuttal report of the Hindle opinions. Mr. Hindle  
14 also mischaracterized a few things on my opening  
15 report. So I'm deferring to Mr. Minnucci to address 06:10:17  
16 Mr. Hindle's criticisms; and until that's resolved,  
17 I'm relying upon Mr. Minnucci.

18 BY MR. RIFFEE:

19 Q. Do you have any independent reason to rely  
20 on Mr. Minnucci over Mr. Hindle? 06:10:32

21 MS. CHAN: Objection. Beyond the scope.

22 THE WITNESS: I've been asked to assume  
23 that Mr. Minnucci's analysis is reliable.

24 BY MR. RIFFEE:

25 Q. If you go to paragraph 93, you note that 06:10:52

1 "these figures can be multiplied by the applicable  
2 minimum wage or other reasonable metric to calculate  
3 the total value of class members' lost time."

4 Have you proposed or did you -- do you  
5 intend to propose another metric, other than the 06:11:14  
6 applicable minimum wage, to calculate the total  
7 value of proposed customer service class members'  
8 lost time?

9 A. I -- I have not proposed an alternative  
10 metric. And it's my recollection that Mr. Levine 06:11:29  
11 applies -- opines that the minimum wage is an  
12 appropriate metric to utilize for purposes of the  
13 type of calculation proposed in this section.

14 Q. And you're relying on Mr. Levine for that  
15 opinion; is that right? 06:11:51

16 A. I am, and my experience calculating  
17 damages, in which I express the opinion that this  
18 would be an appropriate methodology to calculate  
19 damages.

20 Q. So you do intend in this case to offer an 06:12:04  
21 opinion yourself that the minimum wage -- the  
22 applicable California minimum wage is an appropriate  
23 measure for the lost time of these proposed customer  
24 service class period -- class members; is that  
25 right? 06:12:23

1 A. I don't know what I'm going to be asked to  
2 opine on if this matter goes to trial.

3 I would envision that Mr. Levine would  
4 talk about the suitability of that rate and I would  
5 talk about how to identify and implement that rate. 06:12:36

6 Q. Okay. So -- but sitting here today, and  
7 based on the scope of your March 4 report, you have  
8 not offered an opinion as to whether you believe the  
9 California minimum wage is an appropriate measure  
10 for the total value of class members' lost time; 06:12:54  
11 you're relying on Mr. Levine for that opinion. Is  
12 that right?

13 A. (Witness reviews.)

14 Yes, it's my expectation that I'm going to  
15 rely upon Mr. Levine to offer -- offer this 06:13:23  
16 testimony.

17 Q. Do you have an opinion as to whether or  
18 not wait times for a consumer call center should be  
19 recoverable?

20 MS. CHAN: Objection. Ambiguous. 06:13:46  
21 Calls for legal --

22 BY MR. RIFFEE:

23 Q. Sure. Let me restate.

24 Do you have an opinion as to whether or  
25 not consumers should be able to recover damages 06:13:51

1 based solely on wait times for a -- a call center?

2 MS. CHAN: Objection. Calls for legal  
3 conclusion.

4 THE WITNESS: I don't have an opinion on  
5 that. I think the trier of -- trier of fact will 06:14:03  
6 reach its conclusion.

7 BY MR. RIFFEE:

8 Q. Do you agree that actual damages are meant  
9 to reflect what would happen in a -- in a but-for  
10 world, but for the alleged conduct? 06:14:20

11 A. As a general matter, yes.

12 Q. And as defined, or at least as -- as EDD  
13 unemployment benefits recipients, your assumption is  
14 that most of the proposed customer service class  
15 members were unemployed during the proposed customer 06:14:35  
16 service class period between September and November,  
17 correct, of 2020?

18 A. That's my understanding.

19 Q. And your other damages methodologies, in  
20 particular your cost of delayed benefits for the 06:14:50  
21 account freeze class members, assume that they were  
22 unemployed during this period; right?

23 A. Yes.

24 Q. And by definition, if they were  
25 unemployed, they were not receiving minimum wage or 06:15:02

1 any wage during the period when they may have called  
2 the bank's customer service call center; correct?

3 A. That's my general understanding.

4 Q. So but for the time they spent on hold, do  
5 you have any reason to believe that the proposed 06:15:16  
6 class members would have earned minimum wage or some  
7 other wage during the period when they were on hold?

8 MS. CHAN: Objection.

9 THE WITNESS: I don't know that that's the  
10 sole basis for Mr. Levine's opinion. In fact, I 06:15:30  
11 think he is expressing an opinion about the lost  
12 value of that time to the consumer and that  
13 something more valuable could've been do -- been  
14 done than waiting on a phone -- on a hold on a  
15 customer service call. 06:15:47

16 BY MR. RIFFEE:

17 Q. Is it your opinion that every person that  
18 calls a call center and is put on hold is entitled  
19 to damages for the amount of time they're on hold?

20 MS. CHAN: Objection. Hold. 06:15:58

21 THE WITNESS: It depends upon the  
22 circumstances of the situation. But I don't -- I'm  
23 not aware of data indicating that the impact of  
24 consumers wanted to be spending 80 minutes on a  
25 call, to recover funds that have been taken from 06:16:07

## 1 CERTIFICATE OF REPORTER

2 I, Hanna Kim, a Certified Shorthand  
3 Reporter, do hereby certify:

4 That prior to being examined, the witness  
5 in the foregoing proceedings was by me duly sworn to  
6 testify to the truth, the whole truth, and nothing  
7 but the truth;

8 That said proceedings were taken before me  
9 at the time and place therein set forth and were  
10 taken down by me in shorthand and thereafter  
11 transcribed into typewriting under my direction and  
12 supervision;

13 I further certify that I am neither  
14 counsel for, nor related to, any party to said  
15 proceedings, not in anywise interested in the  
16 outcome thereof.

17 Further, that if the foregoing pertains to  
18 the original transcript of a deposition in a federal  
19 case, before completion of the proceedings, review  
20 of the transcript [X] was [ ] was not requested.

21 In witness whereof, I have hereunto  
22 subscribed my name.

23 Dated: June 4, 2025.

24 

25 Hanna Kim, CLR, CSR No. 13083
