1 BANA moved to exclude Greg Regan’s damages opinions and calculations for
2 a very fundamental reason: Regan does not actually have an opinion and did nothing
3 to verify whether any of the damages he purports to calculate were actually suffered
4 by the class. *See* ECF 567-1 (Mot.). Regan does not even know whether any of the
5 class members he purports to calculate damages for were injured *at all*, much less
6 whether they paid 10% or 20% interest charges because they used credit cards to
7 cover the full amount of their claims and/or frozen account balances.

8 The Opposition cannot deny this. *See* ECF 620 (Opp.). Instead, it attempts to
9 foist Plaintiffs’ burden to prove damages on BANA. Plaintiffs then attempt to portray
10 Regan’s methodology as something it is not: a purported measure of interest income
11 based on the time value of money. But the face of Regan’s Report and his testimony
12 show this is not true. As Regan states in his Report and testified, his consequential
13 damages methodology estimates the “cost of borrowing” on a credit-card interest
14 rate. HX 41 ¶ 43. That is precisely the same methodology that this Court rejected at
15 class certification because it was “not supported ... *with evidence showing that [its]*
16 *assumptions are true as to most or even any of the EDD cardholder’s experience,*”
17 and thus “Plaintiffs have not demonstrate[d] that this method measures damages
18 across the entire class that stem from BANA’s actions that created the legal liability.”
19 ECF 494 at 88 (emphasis added). As BANA demonstrated in its Motion, and the
20 Opposition cannot refute, Plaintiffs still have not supported Regan’s methodology
21 with *evidence* showing his assumptions are true *for the class*—as necessary to
22 reliably measure damages across the entire class. In fact, the evidence—which the
23 Opposition asks the Court to ignore—confirms they are not. Thus, Regan’s
24 methodology should be rejected again and excluded.

25 Regan’s attempts to calculate BANA’s purported profits should be excluded
26 for similar reasons: he does not know what, if any, revenue BANA actually would
27 have obtained. But they also must be excluded because Regan and Plaintiffs admit
28 that his disgorgement estimates do not attempt to calculate the actual question they

1 pertain to: BANA's *net* profits, not simply [REDACTED].

2 For each and all of these reasons, and the reasons stated in BANA's Motion,
3 the Court should exclude Regan's opinions under Federal Rule of Evidence 702 and
4 *Daubert* and its progeny as unreliable, irrelevant, unhelpful to the trier of fact.

5 **ARGUMENT**

6 **I. Calculations that Do Not Exclude the Uninjured Must Be Excluded.**

7 Plaintiffs do not dispute that Regan's methodology and damages calculations
8 cannot exclude uninjured cardholders and fraudsters. *See* Opp. 7-8; Mot. 10-13. Nor
9 could they; Regan admitted that his methodology cannot. *See* Mot. 10-12. Instead,
10 Plaintiffs argue that Regan's damages calculations should be permitted because the
11 Court has already decided that it is BANA's burden to disprove *liability* by showing
12 whether or not the Claim Denial and Credit Rescission Classes' accounts were
13 illegitimate and/or their transactions were authorized. *See* Opp. 7-8 (citing ECF 494
14 at 51-52). This misconstrues BANA's argument and the Court's prior holding.

15 Putting aside whether the Court is correct as to which party bears the burden
16 to prove or disprove liability, it is undisputed that Plaintiffs have the burden to prove
17 *damages* in this case. Mot. 1-3; *Stearns v. Ticketmaster Corp.*, 655 F.3d 1013, 1026
18 (9th Cir. 2011) ("a plaintiff must show that the claimed actual damages were 'as a
19 result of' the violation"), *abrogated on other grounds by Comcast Corp. v. Behrend*,
20 569 U.S. 27 (2013); *see also* Opp. 2 (admitting that Plaintiffs have to establish the
21 fact of damages). Specifically, EFTA requires that plaintiffs prove "actual damages"
22 that occurred "as a result of" a financial institution's alleged misconduct. 15 U.S.C.
23 § 1693m(a)(1); *see also* Mot. 10-11; ECF 589-1 (MSJ) at 16-17, 22-24. And to prove
24 actual damages, the cardholder must have been subject to EFTA's protections (e.g.,
25 their accounts must have been established for non-fraudulent reasons), and their
26 disputed transactions must have actually been unauthorized. *See* Mot. 10-11; *Stearns*,
27 655 F.3d at 1026-27 (holding that it would be "difficult or impossible" for *plaintiff*
28 who "fully intended" to make transaction to show actual damages under EFTA).

1 The statute's clear language, which the Opposition does not address, is
2 consistent with the Court's holding at the class certification stage. As the Court
3 explained, while it held that Plaintiffs did not have the burden to establish that their
4 accounts and claims were legitimate to certify a class and potentially to establish
5 liability, it qualified that any non-injured class members would be culled out at the
6 *damages phase*—where Plaintiffs would have the burden to prove “actual damages”
7 to recover anything more than EFTA's capped statutory penalty. ECF 494 at 45; *Ruiz*
8 *Torres v. Mercer Canyons Inc.*, 835 F.3d 1125, 1137 (9th Cir. 2016) (court to winnow
9 out uninjured class members at the damages phase); *see also Healy v. Milliman, Inc.*,
10 164 F.4th 701, 705 (9th Cir. 2026) (plaintiffs required to produce evidence of
11 standing for named and unnamed class members at summary judgment).

12 As BANA established in its Motion, and as Plaintiffs cannot dispute, Regan's
13 methodology cannot do this. *See* Mot. 10-13; *see also id.* 14-19. He simply assumes
14 that every cardholder included in Plaintiffs' class definition who was [REDACTED]
15 [REDACTED] was harmed in the manner alleged.
16 *Id.* 11-12. Regan did nothing to verify this assumption, and the Opposition does not
17 address any of its fallacies—which are contradicted by testimony, documents, [REDACTED]
18 [REDACTED]. *See id.* Thus, Regan's damages calculations are
19 unreliable and should be excluded because they “almost certainly include damages
20 for uninjured class members.” *Utne v. Home Depot U.S.A., Inc.*, 2022 WL 16857061,
21 *5 (N.D. Cal. Nov. 10, 2022) (striking classwide damages estimates). None of
22 Plaintiffs' cases, which are inapt and speak only to the general *Daubert* standard,
23 hold otherwise.¹

24 ¹ The Opposition repeatedly cites *Primano v. Cook*, 598 F.3d 558 (9th Cir. 2010) and
25 *Alaska Rent-a-Car, Inc. v. Avis Budget Grp., Inc.*, 738 F.3d 960 (9th Cir. 2013) to
26 defend many of the fallacies in Regan's opinions and assumptions. *See, e.g.,* Opp. 7-
27 9, 15. Both cases are completely inapt. *Primiano* concerned the admissibility of a
28 medical expert's testimony concerning his opinion on plaintiff's elbow replacement
based on his decades of experience in orthopedic medicine and his assessment of her
medical records and images. 598 F.3d at 565-67. *Alaska Rent-a-Car* concerned
expert testimony regarding how much business and profit a rental car company lost
on account of another's breach of a settlement agreement and merger with another

II. Regan’s Consequential Damages Opinions Are Inadmissible.

A. The Court already rejected the methodology Regan proposes here.

The Opposition does not dispute that Regan’s consequential damages opinions are based on *hypothetical* consumers and *hypothetical* harm they *may* have incurred, rather than the *actual experience* of any class member. *See* Mot. 13, 15-16; HX 41 ¶¶ 40-51; HX 39 48:7-49:15. Plaintiffs also do not dispute that they have not offered any evidence showing that every class member had to borrow money at all, much less that they had to increase their credit card utilization *and* paid interest as a result of BANA’s purported misconduct. Nor could they. Regan admitted that not every class member borrowed or incurred interest charges. HX 39 223:21-224:16; *see also id.* 48:7-49:7. Further, the undisputed evidence shows that [REDACTED]. Mot. 17-18.

Plaintiffs also do not dispute, and in fact readily admit that Regan’s methodology and calculations rely on generalizations that have not been validated based on evidence of even one actual class member’s experience—much less a sampling or the whole. *See* Opp. 9; Mot. 14-17. Plaintiffs simply argue that “[i]t is commonplace for experts to rely on data and draw conclusions that are not specific to any particular party,” and claim that the Court’s class certification approved the same or similar methodology that Regan offered in his Report. Opp. 9-10. But their case is clearly inapposite,² and their argument ignores the law of this case—which

company. 738 F.3d at 967. Neither permitted expert testimony where the expert’s calculations would compensate uninjured class members, or where the expert failed to validate that any of his assumptions were based on evidence and consistent with the actual experiences of class members. *See* Mot. 13-22; *supra* § I; *infra* at 4-7.

² In support, Plaintiffs cite *Elosu v. Middlefork Ranch Inc.*, 26 F.4th 1017, 1025-28 (9th Cir. 2022). But *Elosu* and the permitted opinion are completely inapt. There, the expert was proffered to opine on the cause of a fire. *Id.* at 1026-28. The court found the expert’s testimony was admissible, in part, because it was clear the expert conducted an “independent investigation” and detailed his “exhaustive personal examination of the fire scene,” and because his theory “was also fully consistent with the eyewitness testimony.” *Id.* at 1026-27. Here, Plaintiffs concede Regan conducted no independent investigation, did not personally examine and does not know *any* of the class members’ personal experiences, and his assumptions are [REDACTED]. *See supra* at 2-3; Mot. 15-18.

1 excluded the same opinion that Regan seeks to offer here again. ECF 494 at 88.

2 At class certification, the Court held that Regan’s “Methodology 2” was
3 inadmissible to prove damages because it was “not supported ... *with evidence*
4 *showing that [its] assumptions are true as to most or even any of the EDD*
5 *cardholder’s experience,*” and thus “Plaintiffs have not demonstrate[d] that this
6 method measures damages across the entire class that stem from BANA’s actions
7 that created the legal liability.” ECF 494 at 88 (emphasis added); Mot. 13, 16-17. The
8 Opposition seeks to get around this ruling, arguing that the Court accepted Regan’s
9 “Methodology 1,” and only rejected Methodology 2. Opp. 10. That is true, but it does
10 not save Regan’s consequential damages opinions.

11 Methodology 1 was a generalized proposal to award class members damages
12 based on an “interest rate that reflects the ‘time value of money.’” ECF 494 at 86.
13 Methodology 2 was a proposal to measure consequential damages based on the cost
14 of credit card borrowing. *Id.* at 87-88. Regan’s Report continues to propose the latter.
15 Mot. 5-6, 13-20. As Regan testified and explicitly states in his Report, he continues
16 to measure damages by estimating the “costs of borrowing.” *E.g.*, HX 41 ¶¶ 43-44;
17 HX 39 171:1-172:25. Further, his opinions continue to be based on assumptions only,
18 as neither Regan nor Plaintiffs’ other purported experts (East or Levine) made any
19 attempt to validate whether their “assumptions are true as to most or even any of the
20 EDD cardholder’s experience.” Mot. 14-17; *see also* ECF 565-1, 566-1 (moving to
21 strike East and Levine for similar reasons and others). Regan does so despite
22 admitting that his assumptions are not true for every class member, and conceding
23 that borrowing costs—and the need to borrow at all—varies from person-to-person.
24 Mot. 14-15 (citing HX 39 192:6-193:7, 211:14-213:1). The undisputed record (which
25 Regan did not review) confirms this, as it shows that: [REDACTED]

26 [REDACTED]

27 [REDACTED]

28 [REDACTED] (before any credit-card

1 interest charges could have become due). Mot. 15-20. As the Court previously held,
2 this renders Regan’s consequential damages opinions unreliable and inadmissible.
3 ECF 494 at 88; *see also Kewazinga Corp. v. Google LLC*, 2024 WL 4894840, *4
4 (S.D.N.Y. Oct. 17, 2024) (striking damages computation not based on “sufficient
5 facts or data”).

6 The Opposition’s cases (at 10-12) are distinguishable and cannot save Regan’s
7 cost of borrowing opinions. In *Van v. LLR, Inc.*, 962 F.3d 1160, 1164-65 (9th Cir.
8 2020), the class sought damages measured by the amount of money that the class
9 could have earned if they were not charged a sales tax and put their money to an
10 alternative use. The court ultimately held that could be measured on a classwide basis
11 using the “time value of money,” there a market interest rate of 4.35%—which
12 resulted in a total of \$3.76 on a claim concerning \$531.25 in refunded sales tax
13 charges based on what plaintiff could have earned on an “interest-bearing asset.” *Van*,
14 61 F.4th at 1164-65. But that is not what Plaintiffs propose, and they do not try to
15 evidence what class members could have earned in “interest income.” *Id.* Instead,
16 Plaintiffs seek damages based on the costs of credit-card borrowing, and attempt to
17 support that claim with purported expert opinion regarding costs of credit-card
18 borrowing. *Supra* at 3-4. The Court has already rejected that methodology and should
19 do so again here. *See* ECF 494 at 88.

20 Plaintiffs’ product claim cases also do not endorse the proposition that they are
21 entitled to rely on “generalizations” in lieu of evidence about class members’ actual
22 damages.³ *ConAgra* did not endorse any damages methodology at all; it merely held
23 that plaintiffs’ inability to discern “the identity of all class members” did not
24 transgress the “defendant’s due process rights” because the question at issue was a
25 challenged sales practice. 844 F.3d at 1132. At most, these cases stand for the

26 ³ *See* Opp. 11 & n.3 (citing *Briseno v. ConAgra Foods, Inc.*, 844 F.3d 1121, 1123
27 (9th Cir. 2017) (concerning price premium based on 100% natural claim); *Fitzhenry-*
28 *Russell v. Dr. Pepper Snapple Grp., Inc.*, 326 F.R.D. 592, 598 (N.D. Cal. 2018) (same
based on “made from real ginger” claim); *McMorrow v. Mondelez Int’l, Inc.*, 2021
WL 859137, *1 (S.D. Cal. Mar. 8, 2021) (same based on “nutritious” claim)).

1 proposition that in a case challenging a purportedly false product claim, classwide
2 damages could potentially be calculated by determining the difference between the
3 price class members in particular markets paid and the price that may have been
4 charged in their market but for the false claim. *See, e.g., ConAgra*, 844 F.3d at 1123;
5 *Fitzhenry-Russell*, 326 F.R.D. at 605-06; *McMorrow*, 2021 WL 859137 at *5.

6 Again, that is not anything like what Regan purports to do here. *Supra* at 3-5.
7 Whereas purported prices are set by markets and would have been paid equally by
8 consumers who purchased the same product within that market, the need and “cost
9 of borrowing” indisputably varies from consumer to consumer. *Supra* at 3-5. Indeed,
10 in order for Regan’s assumptions to be met, each and every class member must have,
11 at minimum: (A) had insufficient funds to cover expenses as a result of the alleged
12 wrong; (B) had access to a credit card; (C) had no alternative or cheaper sources to
13 cover those expenses; (D) charged at least the full amount of the temporarily withheld
14 funds to a credit card; and (E) incurred and paid interest on those charges before they
15 regained access to their prepaid card funds. *See supra* at 5; Mot. 13-20. Regan does
16 not claim to know, and Plaintiffs do not attempt to show whether any of these
17 assumptions were met—and we know they were not, [REDACTED]
18 [REDACTED] *See* Mot. 15-18.

19 Finally, the Eighth Circuit’s ruling in *Hartley v. Dillard’s, Inc.*, 310 F.3d 1054
20 (8th Cir. 2022), is even further afield. It was not a class action at all but an individual
21 employment-discrimination case where the parties disagreed over whether “declining
22 profits [] justif[ied] Hartley’s termination.” *Id.* at 1060. Plaintiffs argue that this
23 opinion supports their claim that a damages expert can opine on classwide damages
24 based on “economic generalizations about national trends.” Opp. 12. But the expert
25 opinion had nothing whatsoever to do with damages, only with the factual issue of
26 whether “Dillard’s stated reason for Hartley’s firing was pretextual.” *Hartley*, 310
27 F.3d at 1058. To call this case inapposite is an understatement.

B. The delayed benefits opinion must be excluded for more reasons.

In addition to the reasons discussed above, Regan’s delayed benefits opinion must be stricken because it relies on even more unreliable assumptions. Mot. 20-22. To estimate additional consequential damages for the Account Freeze Class, Regan *assumed* that each and every member of the Account Freeze Class incurred borrowing costs during the time their future EDD benefits payments may have been delayed. Regan admits that he made these assumptions without reviewing any data to confirm them, and without knowing: (1) the amount of bi-weekly payments the class or any individual received; (2) the length of delayed payment for the class or any individual; or (3) whether the class or individual class members remained eligible for benefits during the time their account frozen. HX 39 246:23-251:19; Mot. 20-21. The Opposition does not address this issue at all. Because Regan’s delayed benefits opinions are “based on assumptions rather than evidence establishing each cardholder’s experience,” they must be excluded. ECF 494 at 87-88; Mot. 20-22.

III. Regan’s Customer Service Opinions Are Unreliable and Inadmissible.

Plaintiffs admit that Regan and Jay Minnucci do not contend that every—or any—class member had to spend time they would have spent working at a minimum wage job on hold. Opp. 16; *see also* Mot. 22-23. Plaintiffs further concede that Regan and Minnucci do not intend to measure *actual* harm the class members incurred while on hold. Opp. 16; *see also* Mot. 23. Rather, Plaintiffs again attempt to equate their experts’ approach to the interest income rate permitted in *Van* and similar cases, arguing that they simply need to offer a reasonable way to remedy the injury. Opp. 16. But Plaintiffs offer no case where a court permitted alleged damages for time spent on hold to be calculated using the minimum wage. Nor is there any basis to assume that would be a reasonable measure here, as Regan’s other damages opinions rely on the assumption that each class member was unemployed—and therefore not earning wages when they were allegedly on hold. *See* Mot. 22-23; *Oliver v. Am. Express Co.*, 2024 WL 100848, *12 (E.D.N.Y. Jan. 9, 2024) (affirming exclusion of

1 “conclusory and internally contradictory” expert opinion that “the *Daubert*
2 gatekeeping function is meant to prevent”). Thus, Regan’s customer service opinions
3 and his damages calculations also must be excluded because they are “based on
4 assumptions rather than evidence establishing each cardholder’s experience.” ECF
5 494 at 87-88; Mot. 22-23.

6 Regan’s customer service opinions are also inadmissible because Plaintiffs
7 concede the record does not contain the key inputs for his calculations: data
8 concerning [REDACTED] for each Customer Service Class
9 member. *See* Mot. 23; Opp. 16. Plaintiffs argue that exclusion of Regan’s customer
10 service opinions would be improper because without them, Plaintiffs cannot prove
11 damages. Opp. 16. But that is not a legal basis for denying exclusion. Indeed,
12 summary judgment is frequently granted for defendants in these circumstances. *See*,
13 *e.g., In re Live Concert Antitrust Litig.*, 863 F. Supp. 2d 966, 1000 (C.D. Cal. 2012)
14 (excluding expert testimony and granting summary judgment because without
15 excluded expert, plaintiffs could not prove their case).

16 **IV. Regan’s [REDACTED] Opinions Are Irrelevant and Inadmissible.**

17 Regan’s disgorgement “[REDACTED]” opinions should be excluded because
18 they also are based on assumptions and not evidence. The Opposition does not
19 dispute that Regan’s calculations are not based on records, data, or the experience of
20 even a single class member. *See* Mot. 23-25. Rather, Plaintiffs concede that Regan
21 relied solely on his interpretation of testimony from a BANA employee to assume
22 that [REDACTED]
23 [REDACTED]. Opp. 13. But that assumption
24 is not supported by information for any class members, and is in fact directly refuted
25 by BANA data cited in Regan’s own report—which indisputably confirms that many
26 class members *did not* withdraw their funds immediately. Mot. 24 (citing HX 41,
27 Schedule 2). Thus, Regan’s [REDACTED] opinions also must be excluded because
28 they are “based on assumptions rather than evidence establishing each cardholder’s

1 experience.” ECF 494 at 87-88; *see also Kewazinga*, 2024 WL 4894840, *4 (striking
2 expert computation as not based on “sufficient facts or data”).

3 Plaintiffs claim the Court should nevertheless allow Regan’s [REDACTED]
4 opinion to survive because BANA purportedly made and had this argument rejected
5 at class certification. *See* Opp. 14 (citing ECF 494 at 93). That misstates the record.
6 BANA did not present and the Court did not address the issue raised here. Rather,
7 the Court acknowledged that “BANA d[id] not dispute Plaintiffs’ damages model for
8 disgorgement” at class certification, and therefore concluded that it could satisfy
9 “predominance.” ECF 494 at 93. To the extent the Opposition (at 14) seeks to rely
10 on the UCL’s “particularly forgiving” classwide calculations or the interpretation of
11 the UCL in *Korea Supply Co. v. Lockheed Martin Corp.*, 29 Cal. 4th 1134, 1147-49
12 (2003), those cases are irrelevant now because *Plaintiffs gave up their UCL claim* in
13 response to BANA’s summary judgment motion. ECF 652 (MSJ Opp.) at 50 n.29.

14 Finally, the Opposition argues (at 14-15) that the accuracy of Regan’s
15 assumptions does not matter because California law is intended to eliminate even the
16 possibility of profit, and because the risk of any uncertainty should be borne by
17 defendant. But there is no uncertainty here. Plaintiffs cannot reasonably dispute that
18 BANA incurred [REDACTED] that vastly overwhelm
19 the [REDACTED] Plaintiffs seek to disgorge. *See* Opp. 14-15; Mot. 25;
20 *see also* MSJ 3; ECF 589-2 (SUF) ¶¶ 21-22. Regan did not consider any of those
21 costs or losses when he estimated BANA’s alleged [REDACTED]. Mot. 25.
22 Thus, his opinions are irrelevant and should be excluded because they do not estimate
23 the relevant issue, [REDACTED]. *See* Mot. 25; *Meister v. Mensinger*, 230 Cal.
24 App. 4th 381, 399 (2014).

25 CONCLUSION

26 For the foregoing reasons and the reasons stated in BANA’s Motion, the Court
27 should strike each and all of Regan’s unreliable and irrelevant opinions.
