I, Dara Buck, was sentenced to 42 months confinement on 1-5-23. I am currently being held at FPC Alderson in West Virginia. I respectfully request an emergency compassionate release for extreme medical conditions. My medical conditions include: severe headaches, hearing loss, tears in both shoulders, 5 abdominal hernias, irritable bowel syndrome with diarrhea, chronic kidney disease stage 3, liver enzymes, osteopenia in my lower spine, ovarian failure, and arthritis in both shoulders, knees, back, and both feet.

FPC Alderson lacks the monitoring and medications needed to manage any of my conditions, specifically chronic kidney disease stage 3A. My history of health conditions increase the risk of complications from COVID-19. There are currently over 50 confirmed cases in the past week at this camp. This outbreak puts me at risk for fatality.

I have four children at home and 3 of them are minors. The only family member I have to care for my children is my aunt who is currently ill. She is a recent cancer survivor and still battling with recovery. In the event of an untimely death due to my medical conditions, my aunt would not be able to care for my children for an extended period of time.

There were 4 deaths at this facility last year due to COVID-19. They are not offering any treatment for COVID, only locking everyone into a separate building.

Sentencing factors support granting a sentence reduction because I am not a danger or threat to the community and I have a history of complying with supervision.

Respectfully,

Dara Buck
