UNITED STATES vs MAURICE FAYNE Case Number #1:20-CR-228-MHC-JKL

Charge(s) of Champerty, Maintenance and Barratry

Admiralty Maritime

In the present matter a frivolous claim was filed under the Law Merchant for some perceived failure to perform having failed to inform the heir the true nature and cause of the claim.

The heir has *accepted and surrendered the perfected title to the estate trust* to the Commander-In-Chief via U.S. Registered Mail as directed by the trust indenture thereby creating a ***registered maritime contract*** under the Universal Postal Union (UPU) Regulations. Said registered maritime contract charged a non-discretionary administrative duty as concerns the acceptance and surrender of the estate to facilitate the termination of the trust and the merger of the lesser estate into the greater estate in fulfillment of the trust indenture.

You received a 'Notice of Surrender' establishing your non-discretionary duty to perform and a simple request that you execute that mandatory duty. You chose, rather, to forward the prosecution of the claim in which you have a secret stake and in which you and the court will profit.

Your dishonor charged the Subpoena and demand for a cure to the trespass.

Your failure to appear and answer to the Subpoena constitutes a default establishing the Trespass, in fact. Your default charged the *Admiralty Maritime* **Charge(s) of Champerty, Maintenance and Barratry** for your wanton failure and/or refusal to execute your non-discretionary administrative duty choosing rather to further the prosecution of the frivolous claim for your own profit and gain.

The courts of the United States actively maintain a system of "officious meddling" for profit and gain, whereby agents of the court take both sides of an action to facilitate the malicious prosecution of frivolous claims against the unsuspecting people while employing the secret Law Merchant for and on behalf of the Federal Reserve Banks and all unbeknownst to the people.

We need only look to the public record to establish the facts to overwhelmingly support the Charges of Champerty, Maintenance and Barratry and the intentional creation of a system by the central banks to facilitate their pillage and plunder of the private property. The public records establish the complicity of the legislative branches, the courts and their fellow BAR Association members operating under the secret traditions of the Law Merchant while failing to inform the people of the true nature and cause of the actions.

You have seventy-two (72) hours to fulfill your mandatory obligations under the contract to execute your non-discretionary duty as concerns the acceptance and surrender of the estate to facilitate the termination of the trust and the merger of the lesser estate into the greater in fulfillment of the trust indenture.

Your dishonor shall constitute a confession of judgment and default. Your default shall charge the **Maritime *Claim* of Champerty, Maintenance and Barratry** against you.
