**DECLARATION OF
ANGELINA FARELLA, MD**

Civil Action No.
2:21-cv-00702-CLM

DECLARATION OF ANGELINA FARELLA, MD

Pursuant to 28 U.S.C. §1746, I, Angelina Farella, MD, declare under the penalty of perjury of the laws of the United States of America, and state upon personal knowledge that:

1. I am an adult of sound mind and make this statement voluntarily, based upon my personal knowledge, education, facts or data, and experience, and under penalty of perjury of the laws of the United States of America.
2. I am competent to testify as a medical expert to the facts and matters set forth herein. The facts and matters set forth herein are the types of facts and matters medical experts rely upon to reach expert conclusions. A true and accurate copy of my curriculum vitae is attached hereto as **Exhibit A**.
3. I am a pediatrician currently practicing in the State of Texas and have been in solo private practice for over 25 years.

4. As a pediatrician, I have vaccinated in excess of 10,000 patients in my career. However, the Covid-19 injections are not vaccines. The Covid-19 injections are experimental biological agents whose harms are well documented and growing rapidly. I do not support the use of these agents, nor using America's children as guinea pigs.
5. I am working on this case Pro Bono.
6. I have read the Complaint and Motion for Preliminary Injunction in the above captioned matter, specifically the allegations related to children and adolescents. I agree with the allegations contained in the Complaint and Motion for Preliminary Injunction.
7. The Emergency Use Authorization for adolescents aged 12-15 is inappropriate. Covid-19 has survivability of 99.8% globally and 99.97% under age 70 (Ioannidis, Stanford). For people under age 20 survivability is 99.997%, which is statistically zero!
8. There are 104 children age 0-17 who died from Covid-19 and 287 from Covid + Influenza out of roughly 72 million children in America. This equals ZERO risk. There is NO public interest in subjecting children to experimental vaccination programs, to protect them from a disease that simply does not threaten them.
9. Vaccines take years to safely test. It's not only the number of people tested but the length of time that is important when creating new vaccines. Emergency Use Authorization was granted prematurely for adolescents, before ANY trials were completed. Moderna is scheduled to complete trials on October 31, 2022, and Pfizer is scheduled to complete trials on April 27, 2023.
10. There were no trial patients under the age of 18. The FDA and these pharma companies are currently allowing children 12 years old to receive this shot, when they were never studied in

the trials. **Never before in history have we given medications that were not FDA approved to people who were not initially studied in the trial.**

11. We don't know the outcome of these trials, and we cannot risk America's children whose birthright is decades of healthy life.

I affirm under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on July 16, 2021.
