Committee/Subcommittee hearing bill: Tourism, Infrastructure & Energy Subcommittee

Representative Duran offered the following:

Amendment

Remove lines 48-121 and insert:

320.08069 Digital license plates.—

(1) DEFINITIONS.—As used in this section, the term:

(a) "Digital license plate" means an electronic display that:

1. Is designed to display the information required in this chapter to be included on a physical license plate;

2. Is designed to be placed on a motor vehicle registered under this chapter in lieu of a physical license plate; and

3. Has been determined by the Department of Transportation to have a display that is readable by current automated license plate recognition hardware and software.

(b) "Digital license plate provider" means a person or an entity engaged in the business of providing digital license plate hardware and services to motor vehicle owners.

(2) APPLICABILITY.—Except as otherwise provided in this section or a rule adopted under this section, a digital license plate issued under this section is subject to the laws of this state applicable to a physical license plate. However, digital license plates issued under this section are exempt from s. 320.06(3)(a).

(3) DIGITAL LICENSE PLATE ISSUANCE.—

(a) By October 1, 2023, the department shall allow a motor vehicle registered under this chapter to be equipped with a digital license plate in lieu of a physical license plate issued under s. 320.06 pursuant to a contract between the digital license plate provider and the department entered into under (b). However, the purchaser of a digital license plate must first obtain a physical license plate from the department before obtaining a digital license plate from a digital license plate provider.

(b) The department may contract with digital license plate providers for the issuance of digital license plates, including any services related to the issuance of digital license plates.

The contract must include provisions governing the protection of personal and motor vehicle registration data, including geolocation data, obtained by a digital license plate provider in the performance of its services.

(c) The department may authorize the display of the motor vehicle's validation on each digital license plate in lieu of the validation sticker. The validation must display the owner's birth month, the license plate number, and the year of expiration or appropriate renewal period if the owner is not a natural person. The validation must be displayed in the upper right corner of the digital license plate.

(d) The department may authorize the use of a digital license plate for electronic toll collection, if such use has been approved by the Department of Transportation or other appropriate tolling authority, or to display a parking permit.

(e) The department may establish procedures for displaying the following information on a digital license plate:

1. An emergency alert or other public safety alert issued by a governmental entity, including an alert pursuant to s. 937.021.

2. Static logo displays, including unique displays for fleet license plates as described in s. 320.0657 and digital versions of specialty license plates as described in s. 320.08058, special license plates for military service as authorized in s. 320.089, and special license plates for the

Governor and federal and state legislators as authorized in s. 320.0807.

3. Other displays that the department, in consultation with law enforcement agencies, determines are in the interest of public safety.

(4) DIGITAL LICENSE PLATE REQUIREMENTS.—A digital license plate issued under this section must:

(a) Meet the specifications and requirements adopted under subsection (3).

(b) Include the same information required to be included on a physical license plate and legibly display that information at all times and in all light conditions.

(c) Have wireless connectivity capability.

(5) DIGITAL LICENSE PLATE PROVIDERS.—A digital license plate provider with whom the department contracts shall:

(a) Maintain an inventory of digital license plates issued in this state by the digital license plate provider.

(b) Make available a digital version of each specialty license plate authorized by the department, pursuant to procedures adopted by the department under subparagraph (3)(e) of this section.

Committee/Subcommittee hearing bill: Tourism, Infrastructure & Energy Subcommittee

Representative McClure offered the following:

Amendment

Remove lines 69-77 and insert:

(b) Any public utility customer who owns or leases renewable generation that is in service before January 1, 2023, pursuant to a standard interconnection agreement offered by a public utility, shall be granted 20 years to continue to use the net metering rate design and rates that applied before the revised net metering rule was adopted under paragraph (a). This paragraph applies to customers who purchase or lease real property upon which customer-owned or leased renewable generation is installed for all or part of that 20-year period.

Committee/Subcommittee hearing bill: Tourism, Infrastructure & Energy Subcommittee

Representative Botana offered the following:

Amendment

Remove lines 55-96 and insert:

(I) Includes details about the production, generation, transportation, transmission, or distribution of energy;

(II) Could be useful in planning an attack on critical infrastructure; and

(III) Provides more detailed location information than the general location of the critical infrastructure.

b. "Critical infrastructure" means existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health, or public safety.

6.~~3.~~ Customer meter-derived data and billing information in increments less than one billing cycle.

(b) This exemption applies to such information held by a utility owned or operated by a unit of local government before, on, or after the effective date of this exemption.

(c) This subsection is subject to the Open Government Sunset Review Act in accordance with s. 119.15 and shall stand repealed on October 2, 2027 ~~2024~~, unless reviewed and saved from repeal through reenactment by the Legislature.

Section 2. The Legislature finds that it is a public necessity that information held by a utility owned or operated by a unit of local government and relating to the utility's threat detection, defense, or deterrence of increasing ransomware or cyber-attacks from foreign or domestic terrorists; information regarding the insurance coverage amounts, premium amount paid, self-insurance amounts, and policy terms and conditions of such cyber-security insurance policies held by a utility owned or operate by a unit of local government; and critical energy infrastructure information created or received by the utility, which consists of details about the production, generation, transportation, transmission, or distribution of energy, be exempt from s. 119.07(1), Florida Statutes, and s. 24(a), Article I of the State Constitution. Such information held by a utility owned or operated by a local government is critical information, the release of which could lead to extreme

danger or harm to the citizens of this state. Typical critical energy infrastructure information held by a utility consists of critical asset location, vulnerable electric grid transmission information, emerging technologies utilized by the utility to prevent a cyber-attack, and secure information that utilities in Florida share with regional and federal entities. The exposure or leak of such information could lead to interruptions in the delivery of essential services, as well as financial or physical harm to the citizens of this state. Critical energy infrastructure information has been defined and codified in law in over half of the states in the United States of America in conjunction with the Federal Energy Regulatory Commission. Utilities in Florida have recently been attacked by criminals who hold hostage critical data and operability of the utility for ransom. Public disclosure of insurance coverages provides information to potential attackers as to the monetary limits to which they may seek ransom from these utilities. These vulnerabilities leave all utilities owned and operated by a unit of local government, which control water, electricity, wastewater, and natural gas utilities throughout this state, exposed to cyber-attacks and ransom demands. The Legislature finds that the harm that may result from the release of such information outweighs any public benefit that may be derived from disclosure of the information.
