DECLARATION OF PAUL E. MARIK, MBBCH, M.MED, FCCM, FCCP

1. My name is Paul E. Marik. I am over the age of 18 and am competent to make this declaration. The facts set forth in this declaration are based on my personal knowledge and are submitted solely in my own capacity.
2. The attached curriculum vitae is true and accurate.
3. I received a medical degree in 1981 from the University of Witwatersrand in Johannesburg, South Africa. I have been practicing medicine for over 40 years, with over 30 years of experience as a critical care specialist.
4. My academic credentials include:
 - Bachelor of Medicine, Bachelor of Surgery (MBBCh), from the University of Witwatersrand;
 - Bachelor of Science with Honors in Pharmacology, from the University of Witwatersrand;
 - Diploma in Tropical Medicine and Hygiene (DTM&H), from the University of Witwatersrand;
 - Master of Medicine, from the University of Witwatersrand;
 - Fellow of the College of Physicians of South Africa;
 - Fellow of The Royal College of Physicians of Canada;
 - Fellow of the American College of Critical Care Medicine; and
 - Fellow of the American College of Chest Physicians.
5. I am certified by the:
 - American Board of Internal Medicine, for Internal Medicine and Critical Care Medicine;
 - American Board of Physician Nutrition Specialists, as a Physician Nutrition Specialist;
 - United Council for Neurological Subspecialties (USA), as a Neurocritical Care Specialist;
 - South African Medical and Dental Council, as a General Practitioner with a specialty certification in Internal Medicine, and a sub-specialty certification in Critical Care Medicine;

- British Medical Council, as a General Practitioner with a specialty certification in Internal Medicine; and
 - Canadian Medical Council, as a General Practitioner with a specialty certification in Internal Medicine, and a sub-specialty certification in Critical Care Medicine.
6. According to Semantic Scholar, I have over 750 publications and have been cited more than 40,000 times, with an h-index of 95.
 7. I am a world expert on sepsis, a life-threatening condition and common result of COVID-19, according to Expertscape's PubMed-based algorithm.
 8. I was a Professor of Medicine and Chief of Pulmonary and Critical Care Medicine at Eastern Virginia Medical School ("EVMS") in Norfolk, Virginia, from 2009 through 2021, with tenure starting in 2014. I also served as Director of the Intensive Care Unit at Sentara Norfolk General Hospital from 2009 through 2021.
 9. As Chief of Pulmonary and Critical Care Medicine, I developed the protocol at EVMS for treating COVID-19. It was called the EVMS COVID-19 Management Protocol, which included the MATH+ Protocol. Ivermectin was added to the MATH+ protocol in October/November 2020. I observed the use of ivermectin as an early treatment for COVID-19 to be effective.
 10. Ivermectin is a very safe drug that has been regularly used worldwide.
 11. I was directed to remove the protocol for treating COVID-19 from EVMS servers and not speak publicly about ivermectin following the FDA's tweet deriding the drug as animal medication, instructing the public to stop using it to treat COVID-19, and linking to the FDA's article entitled, "Why You Should Not Use Ivermectin to Treat COVID-19."
 12. I was forced to resign from my positions at EVMS and Norfolk General Hospital for promoting the use of ivermectin—as well as other safe, cheap, and effective off-label FDA-approved drugs—to treat COVID-19 following the FDA's attempts to stop use of those drugs for that purpose.
 13. I am a founding member of Front Line COVID-19 Critical Care Alliance ("FLCCC"), where I serve as Co-Chief Medical Officer.
 14. The FLCCC uses the MATH+ protocol for treating COVID-19.
 15. The FDA's attempt to forbid the use of ivermectin to treat COVID-19 has interfered with my ability to exercise professional judgement in practicing medicine and prescribe appropriate treatment.

16. It doesn't matter whether FDA statements are "non-binding." Doctors have been threatened with revocation of their medical licenses and adverse disciplinary actions should they prescribe ivermectin following the FDA's interference. Hospitals have refused to allow their pharmacies to dispense ivermectin and have threatened doctors to have their hospital privileges revoked should they not comply with the NIH/FDA guidelines. Many pharmacists have refused to fill prescriptions for out-patients with COVID-19 on the basis that the drug is not "FDA approved" for this purpose, even though filling off-label prescriptions is routine. Refusing to allow patients to receive effective early treatment for COVID-19 has led to innumerable hospitalizations and deaths; furthermore, this action has caused extreme distress for patients and their families.
17. The FDA's malignment of ivermectin as only medication for animals, and telling the public to "stop" taking it for COVID-19, has interfered with my ability to exercise professional medical judgment in prescribing ivermectin off-label for that purpose.
18. I declare under penalty of perjury that the foregoing is true and correct.

GRANTS AND FUNDED RESEARCH STUDIES

1989	Once Daily Amikacin Dosing, Baragwanath Hospital ICU, Bristol-Myers Research Grant.
1990	Roussell Laboratories Educational Grant. Baragwanath Hospital ICU, 1990.
1990	Hydrocortisone in Community Acquired Pneumonia. Baragwanath Hospital ICU, Upjohn Research Grant.
1990-1992	Prospective, double-blind, placebo-controlled, randomized, multicenter study of the safety and efficacy of murine monoclonal antibody to human tumor necrosis factor for the treatment of patients with sepsis syndrome. Baragwanath Hospital ICU, 1990-1992.
1994	High Dose vs Low Dose Epinephrine, St. Vincent Hospital, 57 patients.
1994-1996	Randomized, Multicenter North American study of the safety and efficacy of Murine Monoclonal Antibody to Tumor Necrosis Factor(TNF-Mab) for the treatment of patients with septic shock. NORASEPT II. St. Vincent Hospital, Miles Pharmaceuticals.
1994.	A double-blind, randomized study of the efficacy and safety of Cefepime vs Ceftazidime for the treatment of seriously ill patients with pneumonia who are hospitalized in the ICU. St Vincent Hospital.
1994-1996	A randomized, multicenter, double-blind trial comparing intravenous CP-116,517 followed by oral CP-99,219 with intravenous ciprofloxacin followed by oral ciprofloxacin for the treatment of nosocomial pneumonia. St.Vincent Hospital, Pfizer Pharmaceuticals.
1994-1995	An evaluation of the Bispectral Index as a monitoring tool in the ICU. St. Vincent Hospital, Aspect Medical Systems.
1994-1997	Double-Blind, Randomized, Placebo-Controlled, Parallel-Group, Multicenter Study of the Safety and Efficacy of Intravenous Taurolidine in Septic Patients. Wallace Laboratories. St Vincent Hospital.
1997-1998	Antithrombin III in patients with severe sepsis: A multinational, double-blind, placebo-controlled phase-III study. St Vincent Hospital. Centeon and PPD Pharmaco.
1997	Comparison of Option One and a polymeric enteral feeding: Length of stay and clinical and immune parameters. Protocol CP-BH11, Ross Products Division, Abbott Laboratories
1998	Novamatrix. Evaluation of a CO ₂ rebreathing technique for the non-invasive estimation of cardiac Output.
1999	Evaluation of the CapnoProbe A System from Optical Sensors Incorporated
1999	Splanchnic-directed anti-oxidant therapy in critically ill patients: A randomized double-blind controlled study. Research Grant from Metlantic Research Institute.
2000	Adrenal insufficiency in the ICU. Research Grant from Metlantic Research Institute
2005	A comparative study of the Tiger tube frictional nasal jejunal feeding tube and the Dubhoff gastric feeding tube. Cook Medical, \$15 000

2006 Linezolid for the treatment of MRSA pneumonia. Pfizer, \$40 000

2011 Integration of Ultrasound in the Medical Education Curriculum: Impact on Educational Outcomes. General Electric, \$ 1 000 000. Alex Levitov, MD Principle Investigator, Paul Marik, MD, CO-PI.

2014 Research Grant from Cupron inc. \$100 000. The effect of copper-oxide linens on the risk of hospital acquired infections. A RCT. Dr Shivanjali Shankaran, PI, Paul Marik, MD CO-PI.

2018- Research Grnat form Baxter Healthcare Inc. \$30 000. Correlation of transpulmonary thermodilaution/continuous Pulse Contour Cardiac Output (PiCCO) monitoring to Peripheral IntraVenous Analysis (PIVA) for Predicting Volume Responsiveness and Fluid Status: A prospective study. Paul Marik, MD PI.

2018- Research Grant from Open Philanthropy. \$ 3 500 000. Ascorbic acid, Corticosteroids, and Thiamine in Sepsis (ACTS) trial. Michael Donnino, MD, PI, Beth Israel Deaconess Medical Center, Boston, MA. Paul Marik, MD funding coordinator and trial investigator.
