Keeping Customers Informed Through Market Volatility

Our mission at Robinhood is to democratize finance for all. We're proud to have

Exhibit
0006

created a platform that has helped everyday people, from all backgrounds, shape their financial futures and invest for the long term.

We continuously monitor the markets and make changes where necessary. In light of recent volatility, we are restricting transactions for certain securities to position closing only, including $AMC, $BB, $BBBY, $EXPR, $GME, $KOSS, $NAKD and $NOK. We also raised margin requirements for certain securities.

Amid significant market volatility, it's important as ever that we help customers stay informed. That's why we're committed to providing people with educational resources. We recently revamped and expanded Robinhood Learn to help people take advantage of the hundreds of financial resources we offer and educate themselves, including how to make sense of a volatile market. In 2020, more than 3.2 million people read our articles through Robinhood Learn.

We're committed to helping our customers navigate this uncertainty. We fundamentally believe that everyone should have access to financial markets. We're humbled to have helped many people invest in the markets for the first time. And we're determined to provide new and experienced investors with the tools and resources to help them invest responsibly for their long-term financial futures.

Robinhood Learn—the building blocks of your financial journey

Robinhood Financial LLC and Robinhood Crypto, LLC are wholly-owned subsidiaries of Robinhood Markets, Inc.

Securities trading is offered to self-directed customers by Robinhood Financial. Robinhood Financial is a member of the Financial Industry Regulatory Authority (FINRA).

Robinhood Financial LLC is a member of SIPC, which protects securities customers of its members up to $500,000 (including $250,000 for claims for cash). Explanatory brochure available upon request or at www.sipc.org.

Cryptocurrency trading is offered through an account with Robinhood Crypto. Robinhood Crypto is not a member of FINRA or SIPC. Cryptocurrencies are not stocks and your cryptocurrency investments are not protected by either FDIC or SIPC.

Commission-free trading of stocks, ETFs and options refers to $0 commissions for Robinhood Financial self-directed individual cash or margin brokerage accounts that trade U.S. listed securities via mobile devices or Web. Relevant SEC & FINRA fees may apply. Please see the Fee Schedule.

Robinhood Financial is currently registered in the following jurisdictions. This is not an offer, solicitation of an offer, or advice to buy or sell securities, or open a brokerage account in any jurisdiction where Robinhood Financial is not registered. Additional information about your broker can be found by clicking here.

Margin trading involves interest charges and risks, including the potential to lose more than any amounts deposited or the need to deposit additional collateral in a falling market. Before using margin, customers must determine whether this type of trading strategy is right for them given their specific investment objectives, experience, risk tolerance, and financial situation. For more information please see Robinhood Financial's Margin Disclosure Statement, Margin Agreement and FINRA Investor Information. These disclosures contain information on Robinhood Financial's lending policies, interest charges, and the risks associated with margin accounts.

Investors should consider the investment objectives and unique risk profile of Exchange Traded Funds (ETFs) carefully before investing. ETFs are subject to risks similar to those of other diversified portfolios. Leveraged and Inverse ETFs may not be suitable for all investors and may increase exposure to volatility through the use of leverage, short sales of securities, derivatives and other complex investment strategies.

Although ETFs are designed to provide investment results that generally correspond to the performance of their respective underlying indices, they may not be able to exactly replicate the performance of the indices because of expenses and other factors. A prospectus contains this and other information about the ETF and should be read carefully before investing. Customers should obtain prospectuses from issuers and/or their third party agents who distribute and make prospectuses available for review. ETFs are required to distribute portfolio gains to shareholders at year end. These gains may be generated by portfolio rebalancing or the need to meet diversification requirements. ETF trading will also generate tax consequences. Additional regulatory guidance on Exchange Traded Products can be found by clicking here.

Options transactions may involve a high degree of risk. To learn more about the risks associated with options trading, please review the options disclosure document entitled Characteristics and Risks of Standardized Options, available here or through https://www.theocc.com/about/publications/character-risks.jsp.

Investors should be aware that system response, execution price, speed, liquidity, market data, and account access times are affected by many factors, including market volatility, size and type of order, market conditions, system performance, and other factors.

All investments involve risk and the past performance of a security, or financial product does not guarantee future results or returns. There is always the potential of losing money when you invest in securities, or other financial products. Investors should consider their investment objectives and risks carefully before investing.

Trading in cryptocurrencies comes with significant risks, including volatile market price swings or flash crashes, market manipulation, and cybersecurity risks. In addition, cryptocurrency markets and exchanges are not regulated with the same controls or customer protections available in equity, option, futures, or foreign exchange investing. Several federal agencies have also published advisory documents surrounding the risks of virtual currency. For more information see the Robinhood Crypto Risk Disclosure, the CFPB's Consumer Advisory, the CFTC's Customer Advisory, the SEC's Investor Alert, and FINRA's Investor Alert.

Check the background of Robinhood Financial LLC and Robinhood Securities, LLC on FINRA's BrokerCheck.
