Re: Sign-On Support for House Bill 5031 (2025) – SmartZone / Certified Technology Park Extension Option

Dear Chair and Committee Members:

We, the undersigned businesses, entrepreneurs, and community stakeholders, write to express our support for House Bill 5031 (2025), which creates a statutory pathway for a Certified Technology Park (SmartZone) agreement to be extended for an additional 15-year period, subject to local approvals and plan compliance.

As businesses and organizations operating in Michigan, we view the SmartZone model as a key piece of the region's entrepreneurship and innovation support system. The SmartZone approach was created to stimulate the growth of technology-based businesses and jobs and to support commercialization and new business formation. SmartZones are primarily funded through tax increment revenue (TIR) governed by a tax increment financing (TIF) plan, with allowable uses that include common "ecosystem" functions such as business planning support, entrepreneurial training, coordination of venture capital, business mentoring, incubator services, and university/industry research collaboration.

HB 5031 is particularly important because it supports continuity of these services and the long-term planning required to help high-growth companies start, scale, and remain in Michigan—especially in regions where replacing entrepreneurial infrastructure is difficult once disrupted.

For these reasons, we respectfully urge the Committee to advance HB 5031 and support its passage.

Sincerely,

Organization Authsnap, Inc
