Subject: COVID help - supplies

Hi Caroline – good to speak this morning. attached is a spreadsheet of what our manufactuer can produce. below is assurance of who you are working with.

We offer FULL transparency. What we buy the product for and what we sell

we have certificates, pictures, SKU numbers

We just sold 100 million masks to the state if California. Our manufactuer is US approved since they asked for a PO for the strategic reserve.

The FASTEST I can get you 2 million N95 masks is 8-9 days. anyone who says sooner is lying to you. There are NO masks in country. period.

You have to not be thinking in 8 days you have to be thinking 21-40 days when EVERYTHING on the spreadsheet will be increased due to the world market. Every day air and sea shipping goes up. The entire country of China produces 1.66 million masks per day and we are not the only ones buying.

We can give a sober reality and partnership.

happy to answer any questions. Please don't expect or hope the federal government will come in and save the states. They cant. they don't have the supplies if they are asking people like me to find product to help America. You will need to buy now or later and the longer you wait, the longer it will take to arrive and more expensive.

This is a dangerous time. From our manufactuer

Gents,

A short write up of the process in procuring PPE and some of the pitfalls to avoid.

1. Great Health Companion (GHC) is a subsidiary of hakim unique internet co. (HUI)ticker symbol SHE300300. HUI is majority owned and controlled by Chinese State Owned Enterprise (SOE). GHC is a leading healthcare provider that is focused on providing healthcare services, devices, diagnostics and pharmaceuticals to over 350 tier 3A hospitals across China.
2. GHC and its medical supply distribution business unit is contracted with leading SOE PPE manufactures in China to distribute in China and internationally where the law permits.
3. Our process guarantees that medical supplies we procure are authentic from licensed and certified manufacturers. We ensure that our products are fully in compliance with the buyer's local regulatory requirements and suitable for their needs before formally entering any contractual relationships.
4. Our procurement process is fully in compliance with the laws in the PRC ensuring all of our products can legally meet export/import requirements.

Proper Compliant Procedure

1. GHC procures PPE Item from manufacture directly.
2. At the time of shipment, the manufacture is to register in the FDA system online, number of units and estimated time it will be imported into the U.S and the information of the assigned licensed importing entity in the U.S.
3. In order to properly clear U.S Customs, the assigned U.S importing entity must report on its own FDA account online the item's FDA registration number, number units and other corresponding information from the manufacturer prior to the products arrival in the U.S customs.
4. Once it clears customs the U.S importing entity will take items into the clearing house for final inspection and arrange logistics for final destination delivery.
